Maryland General Assembly
2006 Session

FISCAL AND POLICY NOTE
Revised

Senate Bill 382

(Senator Klausmeier, *et al.*)

Budget and Taxation

Ways and Means

Property Tax - Homeowners' Property Tax Credit and Renters' Property Tax Relief

This bill makes several changes to the Homeowners' Property Tax Credit Program. It alters the definitions of assets and gross income, increases the maximum eligible assessment, alters the percentages of income used to calculate the credit, and imposes a combined income limit on recipients. The bill also increases the maximum tax credit allowed under the Renters' Property Tax Relief Program from \$600 to \$750.

The bill takes effect June 1, 2006; the changes to the Homeowners' Property Tax Credit Program are applicable to all taxable years beginning after June 30, 2006, and the changes to the Renters' Property Tax Relief Program are applicable to calendar years beginning after December 31, 2005.

Fiscal Summary

State Effect: General fund expenditures could increase by \$18.1 million in FY 2007 and by \$19.3 million by FY 2011. The FY 2007 budget assumes \$16.7 million in additional general fund credit expenditures. Future years reflect changes in assessments and program participation. Revenues are not affected.

(\$ in millions)	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011
Revenues	\$0	\$0	\$0	\$0	\$0
GF Expenditure	18.1	18.4	18.7	19.0	19.3
Net Effect	(\$18.1)	(\$18.4)	(\$18.7)	(\$19.0)	(\$19.3)

Note:() = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate effect

Local Effect: Local governments that have a homeowners' property tax credit supplement could realize a reduction in expenditures for their programs as a result of the increased State credit.

Small Business Effect: None.

Analysis

Bill Summary: Exhibit 1 shows the proposed changes to the Homeowners' Property Tax Credit Program compared to current law.

Exhibit 1 Comparison of Changes Proposed by SB 382

	<u>Current Law</u>	<u>Senate Bill 382</u>
Definition of Assets	N/A	Excludes the cash value of IRAs or qualified retirement savings plans
Definition of Gross Income	N/A	Includes any withdrawal, payment, or distribution from IRAs or qualified retirement savings plans
Maximum Assessment	\$150,000	\$300,000
Calculation Formula	<ul style="list-style-type: none"> • 0% of the first \$4,000 of combined income • 1% of the second \$4,000 of combined income • 4.5% of the third \$4,000 of combined income • 6.5% of the fourth \$4,000 of combined income • 9% of combined income over \$16,000 	<ul style="list-style-type: none"> • 0% of the first \$8,000 of combined income • 4% of the next \$4,000 of combined income • 6.5% of the next \$4,000 of combined income • 9% of combined income over \$16,000
Income Limitation	N/A	\$60,000
Maximum Renters Tax Relief	\$600	\$750
Fiscal 2007 Additional Expenditures	N/A	\$18.1 million

Current Law: The maximum assessment against which the Homeowners' Property Tax Credit may be granted is \$150,000. In order to determine the amount of the tax credit, the following is added together and then subtracted from the amount of the property owner's tax bill to determine the amount of the tax credit: 0% of the first \$4,000 of combined income; 1% of the second \$4,000 of combined income; 4.5% of the third \$4,000 of combined income; 6.5% of the fourth \$4,000 of combined income; and 9% of the combined income over \$16,000. In order to be eligible for the Homeowners' Property Tax Credit, the combined net worth of a homeowner may not exceed \$200,000 in the calendar year preceding the year the taxpayer applies for the tax credit. The maximum tax credit allowed under the Renters' Property Tax Relief Program is \$600.

Background:

Homeowners' Property Tax Credit Program

The Homeowners' Property Tax Credit Program (Circuit Breaker) is a State-funded program (*i.e.*, the State reimburses local governments) providing credits against State and local real property taxation for homeowners who qualify based on a sliding scale of property tax liability and income. The maximum assessment against which the Homeowners' Property Tax Credit may be calculated has not increased since July 1, 1990. (An adjustment was made in 2001 to reflect the change in the assessment of real property from 40% of full market value to 100% of full market value.) The income brackets were last changed in 1998.

Chapter 588 of 2005 altered the calculation of total real property tax for the Homeowners' Property Tax Credit Program by subtracting the homestead tax credit amount from the total assessment rather than the \$150,000 maximum assessment specified under the credit. Chapter 588 also specified additional eligibility criteria for the local supplement to the Homeowners' Property Tax Credit Program, by authorizing a local jurisdiction to alter the \$200,000 limitation on a homeowner's net worth for eligibility for a local supplement to the Homeowners' Property Tax Credit Program.

Since fiscal 1992, the counties and Baltimore City have been authorized to grant a local supplement to the Homeowners' Property Tax Credit Program. The State Department of Assessments and Taxation (SDAT) administers a local supplement granted by a county, but the cost of a local supplement is borne by the local government. For purposes of the local supplement, the counties are authorized to alter the \$150,000 maximum on the assessed value taken into account in calculating the credit, as well as the percentages and income levels specified in the tax limit formula. The counties are also authorized to impose limitations on eligibility for a local supplement in addition to the requirements

specified for the State credit. Prior to July 1, 2005, Montgomery and Anne Arundel counties were the only jurisdictions providing a local supplement; beginning July 1, 2005, Charles, Frederick, and Howard counties also provided a local supplement.

Municipal corporations are also authorized to provide a local supplement to the Homeowners' Property Tax Credit Program. Under the enabling authority for municipal corporations, a local supplement is a percentage not to exceed 50% of the State credit. The municipal corporations are also authorized to impose additional limitations on eligibility for the local supplement. Beginning July 1, 2005, the City of Rockville began providing a local supplement.

In fiscal 2005, SDAT received 62,758 applications for the credit and issued actual tax credits to 48,601 applicants. The average credit received statewide was \$820. The total amount of tax credits reimbursed to local governments equaled \$39.85 million. In fiscal 2006, SDAT received 62,973 applications for the credit and issued actual tax credits to 46,189 applicants. The average credit received statewide was \$857. The total amount of tax credits reimbursed to local governments equaled \$39.6 million, plus a deficiency appropriation of \$2.1 million.

The budget for fiscal 2007 assumes \$56.7 million in general fund expenditures for the Homeowners' Property Tax Credit Program, including \$16.7 million in expenditures contingent on the passage of legislation that alters the calculation of the credit by increasing the maximum assessment and changing the current income exemption.

Renters' Property Tax Relief Program

The Renters' Property Tax Relief Program provides relief for elderly or disabled renters from the burden attributable to State and local real property taxes. The concept behind the program is that renters indirectly pay property taxes as part of their rent and thus should have some protection, as do homeowners. It is not actually a tax credit, but rather makes payments directly to eligible renters to provide relief for the "assumed property tax" that renters indirectly pay as part of their rent.

Originally, the program was based on an "assumed property tax bill" equal to 10% of rent paid. Credits were substantially increased in 1981 to 15% of rent paid. As under the Homeowners' Property Tax Credit, qualification is based on a sliding scale of assumed property tax liability and income. If the portion of rent attributable to the assumed property taxes exceeds a fixed amount in relation to income, the renter can, under specified conditions, receive a credit of as much as \$600.

The formula to calculate the credit has been altered three times, increasing the credit by \$15 in 1982 and 1985, and again in 1989 by \$40. The maximum credit allowed was increased from \$450 to \$500 in 1985 and to \$600 in 1989. Finally, in 1992, the program was expanded to include certain renters under 60 years of age who live with a minor dependent. The State pays the amount directly to program recipients. The total State expenditure in fiscal 2005 was \$3.3 million.

State Fiscal Effect: The bill makes several significant changes to the Homeowners' Property Tax Credit Program. The bill would increase the number of homeowners eligible for the program as well as increase benefits for those who already receive credits. As a result, it is estimated that general fund expenditures for the tax credit program could increase by approximately \$17.9 million in fiscal 2007, based on the following facts and assumptions:

- General fund expenditures for the program totaled approximately \$41.7 million in fiscal 2006 (including a \$2.1 million deficiency appropriation); there were 46,189 recipients.
- Based on applications for the current credit, approximately 2,628 new participants would receive the credit when the changes imposed by the bill are applied to current participation levels.
- The changes proposed by the bill would result in additional applications and an estimated increase of 1,400 participants; this results in a total program increase of 4,033 participants.

Exhibit 2 shows the estimated general fund increase for the Homeowners' Property Tax Credit Program associated with implementing the provisions of the bill, compared to current expenditures.

The bill increases the average credit from \$857 to \$1,146 per recipient.

However, as noted, the fiscal 2007 budget assumes \$16.7 million in general fund expenditures contingent on passage of legislation that alters the calculation of the credit by increasing the maximum assessment and changing the current income exemption. As a result, general fund expenditures resulting from the bill would increase by \$1.3 million over the amount budgeted in fiscal 2007.

Exhibits 3 and **4** illustrate the effect of the bill on hypothetical homeowners in each county. **Exhibit 3** shows the estimated effect of the bill in each county for a homeowner with an annual income of \$28,000, using the 2007 average home assessment, after application of the homestead tax credit.
