Maryland Quiet Vehicles and Pedestrian Safety Task Force - Reconstitution

This emergency bill reestablishes the Maryland Quiet Vehicles and Pedestrian Safety Task Force and adds two legislative members. The termination date and the final reporting deadline of the task force is December 31, 2010. The bill requires that the final report be made to the Governor in addition to the General Assembly. The bill expresses legislative intent that the Governor appoint the same individuals who were appointed to the predecessor task force established by Chapter 384 of 2008. A technical correction is also made due to the fact that quiet vehicles are registered, but not licensed, by the State.

The bill terminates December 31, 2010.

Fiscal Summary

State Effect: Given the State's fiscal difficulties, agency budgets have been constrained. Thus, the requirement to staff the task force for two additional years may not be absorbable within the existing budgeted resources of the Maryland Department of Transportation. Instead, Transportation Trust Fund expenditures may increase minimally in FY 2010 and 2011 for contractual staff to support the task force. Revenues are not affected.

Local Effect: None.

Small Business Effect: None.

Analysis

Current Law/Background: Chapters 384 and 385 of 2008 established the Maryland Quiet Vehicles and Pedestrian Safety Task Force to:

- study the effects of vehicle sound on pedestrian safety;
- review available research on the effects of vehicle sound on pedestrian safety and consult with consumer groups and safety advocates;
- conduct hearings to accept testimony from experts and the public; and
- make recommendations regarding a minimum sound level, the nature and characteristics of the minimum sound that should be required for all new vehicles sold and licensed in Maryland, and the use of technology to enhance the safety of blind pedestrians.

The task force consisted of one representative from the Maryland Department of Transportation; one representative from the Maryland Department of the Environment; one representative from an organization representing the interests of automobile manufacturers; two or three representatives who represent the organized blind community, are legally blind, and have experience in training the blind to travel safely; and two or three representatives who represent pedestrian organizations.

As required by statute, the task force published a final report in December 2008. The report noted that, because all pedestrians, but particularly blind people, depend on sound cues produced by internal-combustion engines to travel safely, the increase in quieter hybrid, electric, and other low-emission vehicles presents a growing safety concern. The report concluded that there is sufficient anecdotal evidence of this emerging problem, but found that a lack of data from the federal government and automobile industry is preventing progress in addressing this concern. Therefore, the report recommended that the task force be reconstituted and include a member of the Maryland House and Senate. The report also recommended that the General Assembly adopt a resolution encouraging this State's congressional delegation to support federal legislation, that the Governor write to the U.S. Department of Transportation to encourage adoption of regulatory standards, and that the task force actively engage with the State and federal government and industry on how to achieve progress on making quiet vehicles safer for pedestrians.
