24 Section 19–134(c) and 19–303(c)
25 Annotated Code of Maryland
26 (2009 Replacement Volume and 2011 Supplement)

27 Preamble

28 WHEREAS, The State of Maryland has numerous advantages for its residents
29 to enjoy good health care, such as the 3rd highest median household income, the 2nd
30 highest number of primary care physicians per capita, the 10th lowest rate of smoking,
31 and outstanding medical schools; and

32 WHEREAS, Despite these advantages, the State continues to lag behind other
33 states on a number of key health indicators, such as ranking 43rd in infant mortality,
34 31st in early prenatal care, 28th in obesity prevalence, 31st in diabetes prevalence,
35 35th in cardiovascular deaths, 32nd in cancer deaths, and 33rd for geographic health
36 disparities; and

37 WHEREAS, The State also demonstrates significant disparities in health care
38 and health outcomes; and

1 WHEREAS, Examples of these disparities include a Black or African American
2 death rate from HIV/AIDS that is 15 times higher than the White rate; an American
3 Indian or Alaska Native end-stage kidney disease rate that is 3 times the White rate;
4 an Asian or Pacific Islander death rate from tuberculosis that is 9 times higher than
5 the White rate, and Hispanic rate of lack of health insurance that is 4.4 times the
6 White rate; and

7 WHEREAS, Health disparities are the result of modifiable health care system
8 factors, community factors, and individual factors; and

9 WHEREAS, Key strategies for reducing and eliminating health disparities
10 include collection and analysis of racial and ethnic data; inclusion of minority
11 communities in health planning and outreach to those communities with health
12 education and health services; cultural and linguistic health competency among
13 service providers; diversity in the health care and public health workforce; access to
14 primary care practitioners; and attention to the social determinants of health; and

15 WHEREAS, Health disparities present a serious fiscal challenge for our State
16 and nation and result in significant costs; a 2009 report titled “The Economic Burden
17 of Health and Equalities in the United States” released by the Joint Center for
18 Political and Economic Studies found that between 2003 and 2006, the U.S. could have
19 saved nearly \$230 billion in direct medical care costs if racial and ethnic health
20 disparities did not exist; and

21 WHEREAS, By 2045, over one-half of the U.S. population will be persons of
22 color, and in order to reach health equity and stem the tide of rising health care costs,
23 the State must take advantage of the tools provided by the federal Affordable Care Act
24 to expand access, eliminate disparities, and make Maryland the healthiest state in the
25 nation; and

26 WHEREAS, The Maryland Health Quality and Cost Council formed a
27 workgroup to examine ways to reduce health disparities in the State; and

28 WHEREAS, The workgroup noted significant disparities between blacks and
29 whites in Maryland in hospital admission rates measured by the federal Agency for
30 Healthcare Research and Quality; and

31 WHEREAS, The workgroup found that these admission disparities were
32 especially high for lung disease, cardiovascular disease, and diabetes; and

33 WHEREAS, The workgroup and the Maryland Health Quality and Cost Council
34 recommended taking aggressive action to reduce health disparities in Maryland and
35 improve the health of all Marylanders; now, therefore,
