7 Section 7–214
8 Annotated Code of Maryland
9 (2010 Replacement Volume and 2011 Supplement)

10 Preamble

11 WHEREAS, On May 5, 2006, Deanna Camille Green, at the age of fourteen, was
12 electrocuted by 277 volts on a fence in Baltimore City; and

13 WHEREAS, Contact voltage is a voltage present on a publicly accessible
14 structure or surface due to faults in buried or internal wiring that poses a safety risk
15 to pedestrians and pets; and

16 WHEREAS, Deteriorated and damaged utility electric distribution cables may
17 energize a variety of structures and surfaces in the public right-of-way, including
18 utility assets such as manhole covers, light poles, and transformer boxes, as well as
19 nonutility structures and surfaces such as fences, sidewalks, and storm drains; and

20 WHEREAS, On October 28, 2011, the Maryland Public Service Commission
21 approved the adoption of COMAR 20.50.11 Contact Voltage Survey Requirement and
22 Reporting (In Memory of Deanna Camille Green); and

23 WHEREAS, The regulations, with the exception of parks, do not account for the
24 propensity of electric company-owned cables and equipment to energize publicly
25 accessible conductive structures and surfaces not owned by the electric company; and

26 WHEREAS, The regulations do not require testing of those structures and
27 surfaces not owned by the electric company, exposing the public to unnecessary and
28 significant risk; now, therefore,

29 SECTION 1. BE IT ENACTED BY THE GENERAL ASSEMBLY OF
