Department of Legislative Services Maryland General Assembly

2013 Session

FISCAL AND POLICY NOTE

House Bill 499 Environmental Matters (Delegate Glass, et al.)

Natural Resources - Deer Bow Hunting Season - End Date

This bill requires the Department of Natural Resources (DNR) to establish, by regulation, a deer bow hunting season that remains open until the Saturday following January 30.

Fiscal Summary

State Effect: The bill is not expected to materially affect State operations or finances.

Local Effect: The bill is not expected to materially affect local operations or finances.

Small Business Effect: Minimal.

Analysis

Current Law: DNR establishes the open season to hunt forest and upland game birds and mammals by regulation each year. DNR may adopt regulations to enlarge, extend, restrict, or prohibit hunting wildlife. There are three seasons to hunt deer in Maryland: deer bow hunting season; deer firearms season; and deer muzzle loader season.

Under current regulations, Maryland has two deer management regions. Region A includes Allegany and Garrett counties and the western portion of Washington County. Region B includes Anne Arundel, Baltimore, Calvert, Caroline, Carroll, Cecil, Charles, Dorchester, Frederick, Harford, Howard, Kent, Montgomery, Prince George's, Queen Anne's, St. Mary's, Somerset, Talbot, Washington (eastern portion), Wicomico, and Worcester counties.

The 2012-2013 deer bow hunting season takes place during the September 7 through January 31 period on dates that vary by region and by whether or not the deer has antlers.

Background: Because white-tailed deer thrive in habitat that is composed of woods and openings and because hunter access in those areas is limited, suburban development has provided excellent deer habitat in the State, resulting in an escalation of deer populations in suburban areas. Higher populations of deer can lead to a greater number of negative interactions with suburban residents such as deer-vehicle collisions and vegetation damage.

According to DNR, regulated hunting remains the most cost-effective deer population control mechanism available throughout most of the State.

DNR estimates that the bill could result in the harvest of 150 to 400 additional deer in the State each year.
