

# SENATE BILL 530

C5

4r1343  
CF 4r1344

---

By: **Senator Middleton**

Introduced and read first time: January 29, 2014

Assigned to: Finance

---

## A BILL ENTITLED

1 AN ACT concerning

2 **Renewable Energy Portfolio Standard – Thermal Energy**

3 FOR the purpose of altering the renewable energy portfolio standard for certain years;  
4 providing for certain thermal energy sources to be either Tier 1 thermal energy  
5 sources or Tier 2 thermal energy sources; requiring an electricity supplier to  
6 meet the renewable energy portfolio standard by accumulating a certain  
7 amount of renewable energy credits and thermal renewable energy credits;  
8 providing that thermal energy from a Tier 1 thermal renewable source is  
9 eligible for inclusion in meeting the renewable portfolio standard if it is  
10 generated at a certain system or facility; providing that thermal energy from a  
11 Tier 2 thermal renewable source is eligible for meeting the renewable portfolio  
12 standard through a certain year if it is generated at a certain system or facility;  
13 applying certain provisions that relate to renewable energy credits to thermal  
14 renewable energy credits; repealing a provision that provided that an electricity  
15 supplier received credit toward meeting the renewable energy portfolio standard  
16 for electricity derived from the biomass fraction of biomass co-fired with other  
17 fuels; repealing a provision that limited which persons could receive renewable  
18 energy credits for energy generated by a certain geothermal heating and cooling  
19 system; altering the method of determining the amount of thermal renewable  
20 energy credits generated by a certain geothermal heating and cooling system;  
21 altering the method of determining the amount of thermal renewable energy  
22 credits generated by a certain animal manure biomass system; providing that  
23 thermal energy from a woody biomass system is eligible for inclusion in meeting  
24 the renewable energy portfolio standard under certain circumstances; requiring  
25 the Commission to adopt certain regulations relating to woody biomass systems;  
26 requiring the Commission to consider certain metering and verification methods  
27 for woody biomass systems when adopting certain regulations; authorizing an  
28 interested party to petition the Commission to adopt certain new metering and  
29 verification methods under certain circumstances; providing that the owner of a  
30 certain geothermal heating and cooling system or animal manure biomass  
31 system that is registered with the Commission to receive renewable energy

---

EXPLANATION: CAPITALS INDICATE MATTER ADDED TO EXISTING LAW.

[Brackets] indicate matter deleted from existing law.

1 credits as a Tier 1 renewable source before a certain date may remain registered  
 2 as a Tier 1 renewable source that generates renewable energy credits or  
 3 reregister as a Tier 1 thermal renewable source that generates thermal  
 4 renewable energy credits; requiring the Commission, on or before a certain date  
 5 each year, to publish certain information on its Web site regarding the  
 6 availability of thermal renewable energy credits and the adjustment of certain  
 7 compliance fees under certain circumstances; requiring an electricity supplier,  
 8 on or before a certain date each year, to submit certain thermal renewable  
 9 energy credits or pay a certain compliance fee under certain circumstances;  
 10 providing that an electricity supplier may not be required to comply with a  
 11 certain obligation if insufficient thermal renewable energy credits are available  
 12 by a certain date through a certain electronic system; setting certain compliance  
 13 fees for a certain thermal renewable energy credits shortfall; requiring the  
 14 Commission to establish a market-based trading system on the Internet where  
 15 producers of thermal renewable energy credits may register and publish  
 16 thermal renewable energy credits for sale to an electricity supplier; defining  
 17 certain terms; altering and repealing certain definitions; making certain  
 18 clarifying changes; and generally relating to the renewable energy portfolio  
 19 standard.

20 BY repealing and reenacting, with amendments,  
 21 Article – Public Utilities  
 22 Section 7–701, 7–703, 7–704, 7–705(a) and (b), and 7–708  
 23 Annotated Code of Maryland  
 24 (2010 Replacement Volume and 2013 Supplement)

25 BY adding to  
 26 Article – Public Utilities  
 27 Section 7–705(g)  
 28 Annotated Code of Maryland  
 29 (2010 Replacement Volume and 2013 Supplement)

30 SECTION 1. BE IT ENACTED BY THE GENERAL ASSEMBLY OF  
 31 MARYLAND, That the Laws of Maryland read as follows:

32 **Article – Public Utilities**

33 7–701.

34 (a) In this subtitle the following words have the meanings indicated.

35 (b) “Administration” means the Maryland Energy Administration.

36 (c) **“ANIMAL MANURE BIOMASS SYSTEM” MEANS A SYSTEM THAT:**

37 (1) **USES:**

1                   **(I)    PRIMARILY ANIMAL MANURE, INCLUDING POULTRY**  
2 **LITTER, AND ASSOCIATED BEDDING TO GENERATE THERMAL ENERGY THROUGH**  
3 **EITHER ANAEROBIC DIGESTION OR A THERMOCHEMICAL PROCESS; AND**

4                   **(II)   FOOD WASTE OR QUALIFIED BIOMASS FOR THE**  
5 **REMAINDER OF THE FEEDSTOCK; AND**

6                   **(2)    COMPLIES WITH ALL APPLICABLE STATE AND FEDERAL LAWS**  
7 **AND REGULATIONS.**

8           **[(c)] (D)**    “Fund” means the Maryland Strategic Energy Investment Fund  
9 established under § 9–20B–05 of the State Government Article.

10           **[(d)] (E)**    “Geothermal heating and cooling system” means a system that:

11                   (1)    exchanges thermal energy from groundwater or a shallow ground  
12 source to generate thermal energy through a geothermal heat pump or a system of  
13 geothermal heat pumps interconnected with any geothermal extraction facility that is:

14                           (i)    a closed loop or a series of closed loop systems in which fluid  
15 is permanently confined within a pipe or tubing and does not come in contact with the  
16 outside environment; or

17                           (ii)   an open loop system in which ground or surface water is  
18 circulated in an environmentally safe manner directly into the facility and returned to  
19 the same aquifer or surface water source;

20                   (2)    meets or exceeds the **[current]** federal Energy Star product  
21 specification standards **IN EFFECT AT THE TIME OF SYSTEM INSTALLATION;**

22                   (3)    **[replaces or displaces inefficient space or water heating systems**  
23 **whose primary fuel is electricity or a nonnatural gas fuel source;**

24                   (4)    **replaces or displaces inefficient space cooling systems that do not**  
25 **meet federal Energy Star product specification standards;**

26                   **[(5)] (4)**    is manufactured, installed, and operated in accordance with  
27 applicable government and industry standards; and

28                   **[(6)] (5)**    does not feed electricity back to the grid.

29           **[(e)] (F)**    “Industrial process load” means the consumption of electricity by a  
30 manufacturing process at an establishment classified in the manufacturing sector  
31 under the North American Industry Classification System, Codes 31 through 33.

1           **[(f)] (G)**     “Offshore wind energy” means energy generated by a qualified  
2 offshore wind project.

3           **[(g)] (H)**     “Old growth timber” means timber from a forest:

4                   (1)     at least 5 acres in size with a preponderance of old trees, of which  
5 the oldest exceed at least half the projected maximum attainable age for the species;  
6 and

7                   (2)     that exhibits several of the following characteristics:

8                           (i)     shade-tolerant species are present in all age and size  
9 classes;

10                           (ii)    randomly distributed canopy gaps are present;

11                           (iii)  a high degree of structural diversity characterized by  
12 multiple growth layers reflecting a broad spectrum of ages is present;

13                           (iv)   an accumulation of dead wood of varying sizes and stages of  
14 decomposition accompanied by decadence in live dominant trees is present; and

15                           (v)    pit and mound topography can be observed.

16           **[(h)] (I)**     “Offshore wind renewable energy credit” or “OREC” means a  
17 renewable energy credit equal to the generation attributes of 1 megawatt-hour of  
18 electricity that is derived from offshore wind energy.

19           **[(i)] (J)**     “PJM region” means the control area administered by the PJM  
20 Interconnection, as the area may change from time to time.

21           **[(j)] (K)**     “Poultry litter” means the fecal and urinary excretions of poultry,  
22 including wood shavings, sawdust, straw, rice hulls, and other bedding material for  
23 the disposition of manure.

24           **[(k)] (L)**     “Qualified offshore wind project” means a wind turbine electricity  
25 generation facility, including the associated transmission-related interconnection  
26 facilities and equipment, that:

27                   (1)     is located on the outer continental shelf of the Atlantic Ocean in an  
28 area that:

29                           (i)     the United States Department of the Interior designates for  
30 leasing after coordination and consultation with the State in accordance with § 388(a)  
31 of the Energy Policy Act of 2005; and

- 1 (ii) is between 10 and 30 miles off the coast of the State;
- 2 (2) interconnects to the PJM Interconnection grid at a point located on  
3 the Delmarva Peninsula; and
- 4 (3) the Commission approves under § 7–704.1 of this subtitle.

5 **[ (1) (M)**  (1) “Qualifying biomass” means a nonhazardous, organic  
6 material that is available on a renewable or recurring basis, and is:

7 (i) waste material that is segregated from inorganic waste  
8 material and is derived from sources including:

9 1. except for old growth timber, any of the following  
10 forest–related resources:

11 A. mill residue, except sawdust and wood shavings;

12 B. precommercial soft wood thinning;

13 C. slash;

14 D. brush; or

15 E. yard waste;

16 2. a pallet, crate, or dunnage; **OR**

17 3. agricultural and silvicultural sources, including tree  
18 crops, vineyard materials, grain, legumes, sugar, and other crop by–products or  
19 residues; or

20 **[4. gas produced from the anaerobic decomposition of**  
21 **animal waste or poultry waste; or]**

22 (ii) a plant that is cultivated exclusively for purposes of being  
23 used at a **[Tier 1 renewable source or a] Tier 2 THERMAL** renewable source to produce  
24 **[electricity] THERMAL ENERGY.**

25 (2) **[“Qualifying biomass” includes biomass listed in paragraph (1) of**  
26 **this subsection that is used for co–firing, subject to § 7–704(d) of this subtitle.**

27 (3) **“Qualifying biomass” does not include:**

28 (i) unsegregated solid waste or postconsumer wastepaper; or

1 (ii) an invasive exotic plant species.

2 [(m) “Thermal biomass system” means a system that:

3 (1) uses:

4 (i) primarily animal manure, including poultry litter, and  
5 associated bedding to generate thermal energy; and

6 (ii) food waste or qualifying biomass for the remainder of the  
7 feedstock;

8 (2) is used in the State; and

9 (3) complies with all applicable State and federal statutes and  
10 regulations, as determined by the appropriate regulatory authority.]

11 (n) “Renewable energy credit” or “credit” means a credit equal to the  
12 [generation] **ENVIRONMENTAL** attributes of 1 megawatt-hour of electricity that is  
13 derived from a Tier 1 renewable source or a Tier 2 renewable source that is located:

14 (1) in the PJM region;

15 (2) outside the area described in item (1) of this subsection but in a  
16 control area that is adjacent to the PJM region, if the electricity is delivered into the  
17 PJM region; or

18 (3) on the outer continental shelf of the Atlantic Ocean in an area that:

19 (i) the United States Department of the Interior designates for  
20 leasing after coordination and consultation with the State in accordance with § 388(a)  
21 of the Energy Policy Act of 2005; and

22 (ii) is between 10 and 30 miles off the coast of the State.

23 (o) “Renewable energy portfolio standard” or “standard” means the  
24 percentage of electricity sales at retail in the State that is to be derived from  
25 **RENEWABLE ENERGY CREDITS GENERATED BY Tier 1 renewable sources and Tier 2**  
26 **renewable sources AND THERMAL RENEWABLE ENERGY CREDITS GENERATED BY**  
27 **TIER 1 THERMAL RENEWABLE ENERGY SOURCES AND TIER 2 THERMAL**  
28 **RENEWABLE ENERGY SOURCES** in accordance with § 7-703(b) of this subtitle.

29 (p) “Renewable on-site generator” means a person who generates electricity  
30 **OR THERMAL ENERGY** on site from a Tier 1 renewable source, [or a] Tier 2 renewable  
31 source, **TIER 1 THERMAL RENEWABLE SOURCE, OR TIER 2 THERMAL**  
32 **RENEWABLE SOURCE** for the person’s own use.

1 (q) (1) “Solar water heating system” means a system that:

2 (i) consists of glazed liquid-type flat-plate or tubular solar  
3 collectors or concentrating solar thermal collectors as defined and certified to the  
4 OG-100 standard of the Solar Ratings and Certification Corporation;

5 (ii) generates energy using solar radiation for the purpose of  
6 heating water; and

7 (iii) does not feed electricity back to the electric grid.

8 (2) “Solar water heating system” does not include a system that  
9 generates energy using solar radiation for the sole purpose of heating a hot tub or  
10 swimming pool.

11 **(R) “THERMAL RENEWABLE ENERGY CREDIT” MEANS A CREDIT EQUAL**  
12 **TO THE ENVIRONMENTAL ATTRIBUTES OF 3,412,000 BTUS OF THERMAL**  
13 **ENERGY:**

14 **(1) GENERATED BY A TIER 1 THERMAL RENEWABLE SOURCE OR**  
15 **TIER 2 THERMAL RENEWABLE SOURCE; AND**

16 **(2) USED FOR A USEFUL THERMAL APPLICATION.**

17 **[(r)] (S)** “Tier 1 renewable source” means one or more of the following types  
18 of energy sources:

19 (1) solar energy, including energy from photovoltaic technologies and  
20 solar water heating systems;

21 (2) wind;

22 (3) **[qualifying biomass] GAS FROM ANAEROBIC DECOMPOSITION**  
23 **OF ANIMAL WASTE OR POULTRY WASTE;**

24 (4) methane from the anaerobic decomposition of organic materials in  
25 a landfill or wastewater treatment plant;

26 (5) geothermal[, including energy generated through geothermal  
27 exchange from or thermal energy avoided by, groundwater or a shallow ground  
28 source];

29 (6) ocean, including energy from waves, tides, currents, and thermal  
30 differences;

1                                   4.    PROCESS USE; AND

2                                   (II)    IN PLACE OF ELECTRICITY OR A NONRENEWABLE FUEL  
3    IN AN APPLICATION IN WHICH ELECTRICITY OR A NONRENEWABLE FUEL WOULD  
4    HAVE OTHERWISE BEEN USED.

5                                   (2)    “USEFUL THERMAL APPLICATION” DOES NOT INCLUDE  
6    THERMAL ENERGY USED FOR:

7                                   (I)    THE PURPOSE OF DRYING OR REFINING BIOMASS; OR

8                                   (II)   THE SUBSEQUENT GENERATION OF ELECTRICITY.

9                   (X)   (1)   “WOODY BIOMASS” MEANS:

10                                  (I)    CLEAN AND UNTREATED WOOD SUCH AS BRUSH,  
11    STUMPS, LUMBER ENDS OR TRIMMINGS, WOOD PALLETS, BARK, WOOD CHIPS OR  
12    PELLETS, SHAVINGS, SAWDUST, OR SLASH;

13                                  (II)   AN AGRICULTURAL CROP;

14                                  (III)   BIOGAS PRODUCED FROM CLEAN AND UNTREATED  
15    WOOD OR AGRICULTURAL CROPS; OR

16                                  (IV)   LIQUID BIOFUEL PRODUCED FROM CLEAN AND  
17    UNTREATED WOOD OR AGRICULTURAL CROPS.

18                                  (2)    “WOODY BIOMASS” DOES NOT INCLUDE:

19                                  (I)    MATERIALS DERIVED WHOLLY OR PARTLY FROM  
20    CONSTRUCTION AND DEMOLITION DEBRIS; OR

21                                  (II)   LIQUIDS DERIVED FROM MILL RESIDUE.

22                                  (Y)    “WOODY BIOMASS SYSTEM” MEANS A SYSTEM THAT GENERATES  
23    THERMAL ENERGY USING ONLY WOODY BIOMASS.

24    7-703.

25                   (a)   (1)   (i)   The Commission shall implement a renewable energy  
26    portfolio standard that, except as provided under paragraphs (2) and (3) of this  
27    subsection, applies to all retail electricity sales in the State by electricity suppliers.

1 (ii) If the standard becomes applicable to electricity sold to a  
2 customer after the start of a calendar year, the standard does not apply to electricity  
3 sold to the customer during that portion of the year before the standard became  
4 applicable.

5 (2) A renewable energy portfolio standard may not apply to electricity  
6 sales at retail by any electricity supplier:

7 (i) in excess of 300,000,000 kilowatt–hours of industrial process  
8 load to a single customer in a year;

9 (ii) to residential customers in a region of the State in which  
10 electricity prices for residential customers are subject to a freeze or cap contained in a  
11 settlement agreement entered into under § 7–505 of this title until the freeze or cap  
12 has expired; or

13 (iii) to a customer served by an electric cooperative under an  
14 electricity supplier purchase agreement that existed on October 1, 2004, until the  
15 expiration of the agreement.

16 (3) The portion of a renewable energy portfolio standard that  
17 represents offshore wind energy may not apply to electricity sales at retail by any  
18 electricity supplier in excess of:

19 (i) 75,000,000 kilowatt–hours of industrial process load to a  
20 single customer in a year; and

21 (ii) 3,000 kilowatt–hours of electricity in a month to a customer  
22 who is an owner of agricultural land and files an Internal Revenue Service form 1040,  
23 schedule F.

24 (b) The renewable energy portfolio standard shall be as follows:

25 (1) in 2006, 1% from Tier 1 renewable sources and 2.5% from Tier 2  
26 renewable sources;

27 (2) in 2007, 1% from Tier 1 renewable sources and 2.5% from Tier 2  
28 renewable sources;

29 (3) in 2008, 2.005% from Tier 1 renewable sources, including at least  
30 0.005% derived from solar energy, and 2.5% from Tier 2 renewable sources;

31 (4) in 2009, 2.01% from Tier 1 renewable sources, including at least  
32 0.01% derived from solar energy, and 2.5% from Tier 2 renewable sources;

33 (5) in 2010, 3.025% from Tier 1 renewable sources, including at least  
34 0.025% derived from solar energy, and 2.5% from Tier 2 renewable sources;

1 (6) in 2011, 5.0% from Tier 1 renewable sources, including at least  
2 0.05% derived from solar energy, and 2.5% from Tier 2 renewable sources;

3 (7) in 2012, 6.5% from Tier 1 renewable sources, including at least  
4 0.1% derived from solar energy, and 2.5% from Tier 2 renewable sources;

5 (8) in 2013, 8.2% from Tier 1 renewable sources, including at least  
6 0.25% derived from solar energy, and 2.5% from Tier 2 renewable sources;

7 (9) in 2014, 10.3% from Tier 1 renewable sources, including at least  
8 0.35% derived from solar energy, and 2.5% from Tier 2 renewable sources;

9 (10) in [2015,] **2015:**

10 (I) 10.5% from Tier 1 renewable sources, including at least 0.5%  
11 derived from solar energy[, and];

12 (II) 2.5% from Tier 2 renewable sources;

13 (III) **0.01% FROM TIER 1 THERMAL RENEWABLE SOURCES;**

14 **AND**

15 (IV) **3.0% FROM TIER 2 THERMAL RENEWABLE SOURCES;**

16 (11) in [2016,] **2016:**

17 (I) 12.7% from Tier 1 renewable sources, including at least 0.7%  
18 derived from solar energy[, and];

19 (II) 2.5% from Tier 2 renewable sources;

20 (III) **0.25% FROM TIER 1 THERMAL RENEWABLE SOURCES;**

21 **AND**

22 (IV) **3.0% FROM TIER 2 THERMAL RENEWABLE SOURCES;**

23 (12) in 2017:

24 (i) 13.1% from Tier 1 renewable sources, including:

25 1. at least 0.95% derived from solar energy; and

26 2. an amount set by the Commission under § 7-704.2(a)  
27 of this subtitle, not to exceed 2.5%, derived from offshore wind energy; [and]

1 (ii) 2.5% from Tier 2 renewable sources;

2 (III) **0.38% FROM TIER 1 THERMAL RENEWABLE SOURCES;**

3 AND

4 (IV) **3.0% FROM TIER 2 THERMAL RENEWABLE SOURCES;**

5 (13) in 2018:

6 (i) 15.8% from Tier 1 renewable sources, including:

7 1. at least 1.4% derived from solar energy; and

8 2. an amount set by the Commission under § 7-704.2(a)  
9 of this subtitle, not to exceed 2.5%, derived from offshore wind energy; [and]

10 (ii) 2.5% from Tier 2 renewable sources;

11 (III) **0.5% FROM TIER 1 THERMAL RENEWABLE SOURCES;**

12 AND

13 (IV) **3.0% FROM TIER 2 THERMAL RENEWABLE SOURCES;**

14 (14) in [2019,] **2019:**

15 (I) 17.4% from Tier 1 renewable sources, including:

16 [(i)] 1. at least 1.75% derived from solar energy; and

17 [(ii)] 2. an amount set by the Commission under § 7-704.2(a)  
18 of this subtitle, not to exceed 2.5%, derived from offshore wind energy;

19 (II) **0.75% FROM TIER 1 THERMAL RENEWABLE SOURCES;**

20 AND

21 (III) **3.0% FROM TIER 2 THERMAL RENEWABLE SOURCES;**

22 (15) in [2020,] **2020:**

23 (I) 18% from Tier 1 renewable sources, including:

24 [(i)] 1. at least 2.0% derived from solar energy; and

1                    [(ii)] 2.     an amount set by the Commission under § 7-704.2(a)  
2 of this subtitle, not to exceed 2.5%, derived from offshore wind energy; AND

3                    (II)    1.0% FROM TIER 1 THERMAL RENEWABLE SOURCES;

4                    (16) in [2021,] 2021:

5                    (I)     18.7% from Tier 1 renewable sources, including:

6                    [(i)]    1.     at least 2.0% derived from solar energy; and

7                    [(ii)] 2.     an amount set by the Commission under § 7-704.2(a)  
8 of this subtitle, not to exceed 2.5%, derived from offshore wind energy; and

9                    (II)    1.2% FROM TIER 1 THERMAL RENEWABLE SOURCES;

10                   (17) in 2022 [and later,]:

11                   (I)     20% from Tier 1 renewable sources, including:

12                   [(i)]    1.     at least 2% derived from solar energy; and

13                   [(ii)] 2.     an amount set by the Commission under § 7-704.2(a)  
14 of this subtitle, not to exceed 2.5%, derived from offshore wind energy; AND

15                   (II)    1.0% FROM TIER 1 THERMAL RENEWABLE SOURCES;

16                   (18) IN 2023:

17                   (I)     20% FROM TIER 1 RENEWABLE SOURCES, INCLUDING:

18                   1.     AT LEAST 2% DERIVED FROM SOLAR ENERGY; AND

19                   2.     AN AMOUNT SET BY THE COMMISSION UNDER §  
20 7-704.2(A) OF THIS SUBTITLE, NOT TO EXCEED 2.5%, DERIVED FROM OFFSHORE  
21 WIND ENERGY; AND

22                   (II)    1.7% FROM TIER 1 THERMAL RENEWABLE SOURCES;

23 AND

24                   (19) IN 2024 AND LATER:

25                   (I)     20% FROM TIER 1 RENEWABLE SOURCES, INCLUDING:

1                   1.     **AT LEAST 2% DERIVED FROM SOLAR ENERGY; AND**

2                   2.     **AN AMOUNT SET BY THE COMMISSION UNDER §**  
3 **7-704.2(A) OF THIS SUBTITLE, NOT TO EXCEED 2.5%, DERIVED FROM OFFSHORE**  
4 **WIND ENERGY; AND**

5                   **(II) 2% FROM TIER 1 THERMAL RENEWABLE SOURCES.**

6           (c)     Before calculating the number of **RENEWABLE ENERGY** credits **AND**  
7 **THERMAL RENEWABLE ENERGY CREDITS** required to meet the percentages  
8 established under subsection (b) of this section, an electricity supplier shall exclude  
9 from its total retail electricity sales all retail electricity sales described in subsection  
10 (a)(2) and (3) of this section.

11           (d)     Subject to subsections (a) and (c) of this section and in accordance with [§  
12 7-704.2] **§§ 7-704.2 AND 7-705(G)** of this subtitle, an electricity supplier shall meet  
13 the renewable energy portfolio standard by accumulating the equivalent amount of  
14 renewable energy credits **AND THERMAL RENEWABLE ENERGY CREDITS** that equal  
15 the percentages required under this section.

16 7-704.

17           (a)     (1)   **[Energy] ELECTRICITY** from a Tier 1 renewable source:

18                   (i)     is eligible for inclusion in meeting the renewable energy  
19 portfolio standard regardless of when the generating system or facility was placed in  
20 service; and

21                   (ii)    may be applied to the percentage requirements of the  
22 standard for either Tier 1 renewable sources or Tier 2 renewable sources.

23                   (2)     (i)   **[Energy] ELECTRICITY** from a Tier 1 renewable source  
24 under [§ 7-701(r)(1),] **§ 7-701(S)(1), (5), (9), (10), or (11)** of this subtitle is eligible for  
25 inclusion in meeting the renewable energy portfolio standard only if the source is  
26 connected with the electric distribution grid serving Maryland.

27                   (ii)    If the owner of a solar generating system in this State  
28 chooses to sell solar renewable energy credits from that system, the owner must first  
29 offer the credits for sale to an electricity supplier or electric company that shall apply  
30 them toward compliance with the renewable energy portfolio standard under § 7-703  
31 of this subtitle.

32                   (3)     **[Energy] ELECTRICITY** from a Tier 1 renewable source under [§  
33 7-701(r)(8)] **§ 7-701(S)(8)** of this subtitle is eligible for inclusion in meeting the  
34 renewable energy portfolio standard if it is generated at a dam that existed as of

1 January 1, 2004, even if a system or facility that is capable of generating electricity  
2 did not exist on that date.

3 (4) [Energy] **ELECTRICITY** from a Tier 2 renewable source under [§  
4 7-701(s)] **§ 7-701(U)** of this subtitle is eligible for inclusion in meeting the renewable  
5 energy portfolio standard through 2018 if it is generated at a system or facility that  
6 existed and was operational as of January 1, 2004, even if the facility or system was  
7 not capable of generating electricity on that date.

8 (5) **THERMAL ENERGY FROM A TIER 1 THERMAL RENEWABLE**  
9 **SOURCE UNDER § 7-701(T) OF THIS SUBTITLE IS ELIGIBLE FOR INCLUSION IN**  
10 **MEETING THE RENEWABLE PORTFOLIO STANDARD IF IT IS GENERATED AT A**  
11 **SYSTEM OR FACILITY THAT:**

12 (I) **DELIVERS THE THERMAL ENERGY THROUGH DIRECT**  
13 **HEAT, STEAM, HOT WATER, OR OTHER THERMAL FORM FOR A USEFUL THERMAL**  
14 **APPLICATION BY AN END-USER IN MARYLAND; AND**

15 (II) **IS PLACED IN SERVICE AFTER JANUARY 1, 2015.**

16 (6) **THERMAL ENERGY FROM A TIER 2 THERMAL RENEWABLE**  
17 **SOURCE UNDER § 7-701(V) OF THIS SUBTITLE IS ELIGIBLE FOR INCLUSION IN**  
18 **MEETING THE RENEWABLE PORTFOLIO STANDARD THROUGH 2019 IF IT IS**  
19 **GENERATED AT A SYSTEM OR FACILITY THAT DELIVERS THE THERMAL ENERGY**  
20 **THROUGH DIRECT HEAT, STEAM, OR OTHER THERMAL FORM FOR A USEFUL**  
21 **THERMAL APPLICATION BY AN END-USER IN MARYLAND.**

22 (b) On or after January 1, 2004, an electricity supplier may:

23 (1) receive renewable energy credits **AND THERMAL RENEWABLE**  
24 **ENERGY CREDITS**; and

25 (2) accumulate renewable energy credits **AND THERMAL**  
26 **RENEWABLE ENERGY CREDITS** under this subtitle.

27 (c) (1) This subsection applies only to a generating facility that is placed  
28 in service on or after January 1, 2004.

29 (2) (i) On or before December 31, 2005, an electricity supplier shall  
30 receive 120% credit toward meeting the renewable energy portfolio standard for  
31 energy derived from wind.

32 (ii) After December 31, 2005, and on or before December 31,  
33 2008, an electricity supplier shall receive 110% credit toward meeting the renewable  
34 energy portfolio standard for energy derived from wind.

1           (3) On or before December 31, 2008, an electricity supplier shall  
2 receive 110% credit toward meeting the renewable energy portfolio standard for  
3 energy derived from methane under § 7-701(r)(4) of this subtitle.

4           (d) [An electricity supplier shall receive credit toward meeting the renewable  
5 energy portfolio standard for electricity derived from the biomass fraction of biomass  
6 co-fired with other fuels.

7           (e)] (1) In this subsection, “customer” means:

8                   (i) an industrial electric customer that is not on standard offer  
9 service; or

10                   (ii) a renewable on-site generator.

11           (2) This subsection does not apply to offshore wind renewable energy  
12 credits.

13           (3) (i) A customer may independently acquire renewable energy  
14 credits **AND THERMAL RENEWABLE ENERGY CREDITS** to satisfy the standards  
15 applicable to the customer’s load, including credits created by a renewable on-site  
16 generator.

17                   (ii) [Credits] **RENEWABLE ENERGY CREDITS AND THERMAL**  
18 **RENEWABLE ENERGY CREDITS** that a customer transfers to its electricity supplier to  
19 meet the standard and that the electricity supplier relies on in submitting its  
20 compliance report may not be resold or retransferred by the customer or by the  
21 electricity supplier.

22           (4) A renewable on-site generator may retain or transfer at its sole  
23 option any **RENEWABLE ENERGY** credits **AND THERMAL RENEWABLE ENERGY**  
24 **CREDITS** created by the renewable on-site generator, including **RENEWABLE**  
25 **ENERGY** credits for the portion of its on-site generation from a Tier 1 renewable  
26 source or a Tier 2 renewable source that displaces the purchase of electricity by the  
27 renewable on-site generator from the grid.

28           (5) A customer that satisfies the standard applicable to the customer’s  
29 load under this subsection may not be required to contribute to a compliance fee  
30 recovered under § 7-706 of this subtitle.

31           (6) The Commission shall adopt regulations governing the application  
32 and transfer of **RENEWABLE ENERGY** credits **AND THERMAL RENEWABLE ENERGY**  
33 **CREDITS** under this subsection consistent with federal law.

1            ~~[(f) (1)] (E)~~        In order to create a renewable energy credit **OR THERMAL**  
2 **RENEWABLE ENERGY CREDIT**, a Tier 1 renewable ~~[source or]~~ **SOURCE**, Tier 2  
3 renewable source, **TIER 1 THERMAL RENEWABLE SOURCE, OR TIER 2 THERMAL**  
4 **RENEWABLE SOURCE** must substantially comply with all applicable environmental  
5 and administrative requirements, including air quality, water quality, solid waste, and  
6 right-to-know provisions, permit conditions, and administrative orders.

7            ~~[(2) (i)] (F)~~        **(1)**    This ~~[paragraph]~~ **SUBSECTION** applies to Tier  
8 1 renewable sources that incinerate solid waste.

9                            ~~[(ii)] (2)~~        At least 80% of the solid waste incinerated at a Tier 1  
10 renewable source facility shall be collected from:

11                            ~~[1.] (I)~~        for areas in Maryland, jurisdictions that  
12 achieve the recycling rates required under § 9–505 of the Environment Article; and

13                            ~~[2.] (II)~~        for other states, jurisdictions for which the  
14 electricity supplier demonstrates recycling substantially comparable to that required  
15 under § 9–505 of the Environment Article, in accordance with regulations of the  
16 Commission.

17                            ~~[(iii)] (3)~~        An electricity supplier may report **RENEWABLE**  
18 **ENERGY** credits received under this paragraph based on compliance by the facility  
19 with the percentage requirement of ~~[subparagraph (ii)]~~ **PARAGRAPH (2)** of this  
20 ~~[paragraph]~~ **SUBSECTION** during the year immediately preceding the year in which  
21 the electricity supplier receives the **RENEWABLE ENERGY** credit to apply to the  
22 standard.

23            (g)    (1)    Energy from a solar water heating system is eligible for inclusion  
24 in meeting the renewable energy portfolio standard.

25                            (2)    A person that owns and operates a solar water heating system  
26 shall receive a renewable energy credit equal to the amount of energy, converted from  
27 BTUs to kilowatt-hours, that is generated by the system that is used by the person for  
28 water heating.

29                            (3)    The total amount of energy generated and consumed for a  
30 nonresidential or commercial solar water heating system shall be measured by an  
31 on-site meter that meets the required performance standards of the International  
32 Organization of Legal Metrology.

33                            (4)    The total amount of energy generated and consumed by a  
34 residential solar water heating system shall be:

35                            (i)    measured by a meter that meets the required standards of  
36 the International Organization of Legal Metrology; or

1 (ii) 1. measured by the Solar Ratings and Certification  
2 Corporation's OG-300 thermal performance rating for the system or an equivalent  
3 certification that the Commission approves in consultation with the Administration;  
4 and

5 2. certified to the OG-300 standard of the Solar Ratings  
6 and Certification Corporation or an equivalent certification body that the Commission  
7 approves in consultation with the Administration.

8 (5) A residential solar water heating system shall be installed in  
9 accordance with applicable State and local plumbing codes.

10 (6) A residential solar water heating system may not produce more  
11 than five solar renewable energy credits in any 1 year.

12 (h) (1) [Energy] **THERMAL ENERGY** from a geothermal heating and  
13 cooling system is eligible for inclusion in meeting the renewable energy portfolio  
14 standard.

15 (2) [A person shall receive a renewable energy credit equal to the  
16 amount of energy, converted from BTUs to kilowatt-hours, that is generated by a  
17 geothermal heating and cooling system for space heating and cooling or water heating  
18 if the person:

19 (i) owns and operates the system;

20 (ii) leases and operates the system; or

21 (iii) contracts with a third party who owns and operates the  
22 system.

23 (3) To determine the [energy savings of a] **ANNUAL AMOUNT OF**  
24 **THERMAL RENEWABLE ENERGY CREDITS AWARDED FOR A RESIDENTIAL**  
25 geothermal heating and cooling system [for a residence], the Commission shall:

26 (i) identify available Internet-based energy consumption  
27 calculators developed by the geothermal heating and cooling industry;

28 (ii) collect the following data provided in the renewable energy  
29 credit application that:

30 1. describes the name of the applicant and the address  
31 at which the geothermal heating and cooling system is installed; and

32 2. provides the annual BTU energy savings attributable  
33 to home heating, cooling, and water heating; and

1 (iii) [in determining the annual amount of renewable energy  
2 credits awarded for the geothermal heating and cooling system,] convert the annual  
3 [BTUs into annual megawatt hours] **BTU ENERGY SAVINGS INTO THERMAL**  
4 **RENEWABLE ENERGY CREDITS.**

5 **[(4) (3)** To determine the [energy savings of] **ANNUAL AMOUNT OF**  
6 **THERMAL RENEWABLE ENERGY CREDITS AWARDED FOR** a nonresidential  
7 geothermal heating and cooling system, the Commission shall:

8 (i) use the geothermal heating and cooling engineering  
9 technical system designs provided with the **THERMAL** renewable energy credit  
10 application; and

11 (ii) in determining the annual amount of **THERMAL** renewable  
12 energy credits awarded for the geothermal heating and cooling system, convert the  
13 annual [BTUs into annual megawatt hours] **BTU ENERGY SAVINGS INTO THERMAL**  
14 **RENEWABLE ENERGY CREDITS.**

15 **[(5) (4)** A geothermal heating and cooling system shall be installed  
16 in accordance with applicable State well construction and local building code  
17 standards.

18 (i) (1) [Energy from a thermal] **ENERGY FROM AN ANIMAL MANURE**  
19 biomass system is eligible for inclusion in meeting the renewable energy portfolio  
20 standard.

21 (2) [(i) A person that owns and operates a thermal biomass system  
22 that uses anaerobic digestion is eligible to receive a renewable energy credit.

23 (ii) **A] BEFORE RECEIVING THERMAL RENEWABLE ENERGY**  
24 **CREDITS,** A person that owns and operates [a thermal] **AN ANIMAL MANURE** biomass  
25 system that uses a thermochemical process [is eligible to receive a renewable energy  
26 credit if the person demonstrates] **SHALL DEMONSTRATE** to the Maryland  
27 Department of the Environment that the operation of the [thermal] **ANIMAL MANURE**  
28 biomass system:

29 **[1.] (I)** is not significantly contributing to local or  
30 regional air quality impairments; and

31 **[2.] (II)** will substantially decrease emissions of oxides  
32 of nitrogen beyond that achieved by a direct burn combustion unit through the use of  
33 precombustion techniques, combustion techniques, or postcombustion techniques.

1           (3) [A person that is eligible to receive a renewable energy credit  
2 under paragraph (2) of this subsection shall receive a renewable energy credit equal to  
3 the amount of energy, converted from BTUs to kilowatt–hours, that is generated by  
4 the thermal biomass system and used on site.

5           (4)] The total amount of energy generated and consumed for a  
6 residential, nonresidential, or commercial [thermal] ANIMAL MANURE biomass  
7 system shall be measured by an on–site meter that meets the required performance  
8 standards established by the Commission.

9           [(5)] (4) The Commission shall adopt regulations for the metering,  
10 verification, and reporting of the output of [thermal] ANIMAL MANURE biomass  
11 systems.

12           **(J) (1) THERMAL ENERGY FROM A WOODY BIOMASS SYSTEM IS  
13 ELIGIBLE FOR INCLUSION IN MEETING THE RENEWABLE ENERGY PORTFOLIO  
14 STANDARD IF THE WOODY BIOMASS SYSTEM:**

15                           **(I) ACHIEVES A NET SYSTEM EFFICIENCY OF 65% OR  
16 GREATER; AND**

17                           **(II) COMPLIES WITH ALL APPLICABLE STATE AND FEDERAL  
18 LAWS AND REGULATIONS.**

19           **(2) THE COMMISSION SHALL ADOPT REGULATIONS FOR THE  
20 METERING, VERIFICATION, AND REPORTING OF THE OUTPUT OF WOODY  
21 BIOMASS SYSTEMS.**

22           **(3) WHEN ADOPTING REGULATIONS UNDER PARAGRAPH (2) OF  
23 THIS SUBSECTION, THE COMMISSION SHALL CONSIDER METERING AND  
24 VERIFICATION METHODS THAT ARE TECHNICALLY FEASIBLE FOR COMMERCIAL,  
25 INDUSTRIAL, AND RESIDENTIAL CUSTOMERS.**

26           **(4) AN INTERESTED PARTY MAY PETITION THE COMMISSION TO  
27 ADOPT NEW METERING AND VERIFICATION METHODS NOT AUTHORIZED BY A  
28 REGULATION ADOPTED UNDER PARAGRAPH (2) OF THIS SUBSECTION.**

29           **(K) THE OWNER OF A GEOTHERMAL HEATING AND COOLING SYSTEM OR  
30 AN ANIMAL MANURE BIOMASS SYSTEM THAT WAS REGISTERED WITH THE  
31 COMMISSION TO RECEIVE RENEWABLE ENERGY CREDITS ELIGIBLE FOR  
32 INCLUSION IN THE RENEWABLE PORTFOLIO STANDARD AS A TIER 1 RENEWABLE  
33 SOURCE BEFORE OCTOBER 1, 2014, MAY ELECT TO:**

- 1 E. 15 cents in 2019 and 2020;
- 2 F. 10 cents in 2021 and 2022; and
- 3 G. 5 cents in 2023 and later; and
- 4 3. 1.5 cents for each kilowatt-hour of shortfall from  
5 required Tier 2 renewable sources; or
- 6 (ii) for industrial process load:
- 7 1. for each kilowatt-hour of shortfall from required Tier  
8 1 renewable sources, a compliance fee of:
- 9 A. 0.8 cents in 2006, 2007, and 2008;
- 10 B. 0.5 cents in 2009 and 2010;
- 11 C. 0.4 cents in 2011 and 2012;
- 12 D. 0.3 cents in 2013 and 2014;
- 13 E. 0.25 cents in 2015 and 2016; and
- 14 F. except as provided in paragraph (3) of this subsection,  
15 0.2 cents in 2017 and later; and
- 16 2. nothing for any shortfall from required Tier 2  
17 renewable sources.

18 (3) For industrial process load, the compliance fee for each  
19 kilowatt-hour of shortfall from required Tier 1 renewable sources is:

- 20 (i) 0.1 cents in any year during which suppliers are required to  
21 purchase ORECs under § 7-704.2 of this subtitle; and
- 22 (ii) nothing for the year following any year during which, after  
23 final calculations, the net rate impact per megawatt-hour from qualified offshore wind  
24 projects exceeded \$1.65 in 2012 dollars.

25 **(G) (1) ON OR BEFORE MARCH 1 OF EACH YEAR, THE COMMISSION**  
26 **SHALL PUBLISH ON ITS WEB SITE:**

27 **(I) WHETHER SUFFICIENT THERMAL RENEWABLE ENERGY**  
28 **CREDITS ARE AVAILABLE ON THE ELECTRONIC SYSTEM TO FULFILL THE**

1 OBLIGATION SPECIFIED IN § 7-703(B) OF THIS SUBTITLE FOR EACH  
2 ELECTRICITY SUPPLIER DURING THE PREVIOUS CALENDAR YEAR; AND

3 (II) IF INSUFFICIENT THERMAL RENEWABLE ENERGY  
4 CREDITS ARE AVAILABLE UNDER SUBPARAGRAPH (I) OF THIS PARAGRAPH, A  
5 REDUCED OBLIGATION THAT ADJUSTS THE OBLIGATION SPECIFIED IN §  
6 7-703(B) OF THIS SUBTITLE PROPORTIONALLY BASED ON THE NUMBER OF  
7 THERMAL RENEWABLE ENERGY CREDITS AVAILABLE ON THE ELECTRONIC  
8 SYSTEM COMPARED TO THE NUMBER OF THERMAL RENEWABLE ENERGY  
9 CREDITS ELECTRICITY SUPPLIERS WOULD HAVE BEEN REQUIRED TO PURCHASE  
10 UNDER THE FULL OBLIGATION.

11 (2) ON OR BEFORE APRIL 1 OF EACH YEAR, AN ELECTRICITY  
12 SUPPLIER SHALL:

13 (I) SUBMIT THERMAL RENEWABLE ENERGY CREDITS UP TO  
14 THE ELECTRICITY SUPPLIER'S OBLIGATION AS DETERMINED BY THE  
15 COMMISSION UNDER PARAGRAPH (1) OF THIS SUBSECTION; OR

16 (II) PAY A COMPLIANCE FEE UNDER PARAGRAPH (4) OF  
17 THIS SUBSECTION FOR EACH THERMAL RENEWABLE ENERGY CREDIT  
18 SHORTFALL IN MEETING THE ELECTRICITY SUPPLIER'S OBLIGATION AS  
19 DETERMINED BY THE COMMISSION UNDER PARAGRAPH (1) OF THIS  
20 SUBSECTION.

21 (3) AN ELECTRICITY SUPPLIER MAY NOT BE REQUIRED TO  
22 COMPLY WITH THE OBLIGATION SPECIFIED IN § 7-703(B) FOR THERMAL  
23 RENEWABLE ENERGY CREDITS IF THERE ARE NO THERMAL RENEWABLE  
24 ENERGY CREDITS AVAILABLE ON MARCH 1 THROUGH THE TRADING SYSTEM  
25 ESTABLISHED UNDER § 7-708 OF THIS SUBTITLE DURING THE PREVIOUS  
26 CALENDAR YEAR.

27 (4) AN ELECTRICITY SUPPLIER SHALL PAY INTO THE MARYLAND  
28 STRATEGIC ENERGY INVESTMENT FUND ESTABLISHED UNDER § 9-20B-05 OF  
29 THE STATE GOVERNMENT ARTICLE THE FOLLOWING AMOUNTS FOR EACH  
30 THERMAL RENEWABLE ENERGY CREDIT SHORTFALL THAT OCCURS IN  
31 ACCORDANCE WITH PARAGRAPH (2) OF THIS SUBSECTION:

32 (I) FOR EACH 3,412 BTU SHORTFALL IN THERMAL  
33 RENEWABLE ENERGY CREDITS FROM TIER 1 THERMAL RENEWABLE SOURCES:

34 1. 3 CENTS IN 2015;

- 1                   2.    **2.75 CENTS IN 2016;**
- 2                   3.    **2.5 CENTS IN 2017;**
- 3                   4.    **2.25 CENTS IN 2018; AND**
- 4                   5.    **2 CENTS IN 2019 AND LATER; AND**

5                   **(II) FOR EACH 3,412 BTU SHORTFALL IN THERMAL**  
6 **RENEWABLE ENERGY CREDITS FROM TIER 2 THERMAL RENEWABLE SOURCES:**

- 7                   1.    **0.025 CENTS IN 2015;**
- 8                   2.    **0.02 CENTS IN 2016;**
- 9                   3.    **0.015 CENTS IN 2017;**
- 10                  4.    **0.01 CENTS IN 2018; AND**
- 11                  5.    **0.005 CENTS IN 2019.**

12 7-708.

13           (a)   (1)   The Commission shall establish and maintain a market-based  
14 renewable electricity trading system to facilitate the creation and transfer of  
15 renewable energy credits **AND THERMAL RENEWABLE ENERGY CREDITS.**

16           (2)   To the extent practicable, the trading system shall be consistent  
17 with and operate in conjunction with the trading system developed by PJM  
18 Interconnection, Inc., if available.

19           (3)   The Commission may contract with a for-profit or a nonprofit  
20 entity to assist in the administration of the electricity trading system required under  
21 paragraph (1) of this subsection.

22           (b)   (1)   The system shall include a registry of pertinent information  
23 regarding all:

24                   (i)   available renewable energy credits **AND THERMAL**  
25 **RENEWABLE ENERGY CREDITS;** and

26                   (ii)   renewable energy credit **AND THERMAL RENEWABLE**  
27 **ENERGY CREDIT** transactions among electricity suppliers in the State, including:

1                   1.     the creation and application of renewable energy  
2 credits **AND THERMAL RENEWABLE ENERGY CREDITS**;

3                   2.     the number of renewable energy credits **AND**  
4 **THERMAL RENEWABLE ENERGY CREDITS** sold or transferred; and

5                   3.     the price paid for the sale or transfer of renewable  
6 energy credits **AND THERMAL RENEWABLE ENERGY CREDITS**.

7                   (2)   (i)     The registry shall provide current information to electricity  
8 suppliers and the public on the status of renewable energy credits **AND THERMAL**  
9 **RENEWABLE ENERGY CREDITS** created, sold, or transferred in the State.

10                   (ii)   Registry information shall be available by computer network  
11 access through the Internet.

12                   SECTION 2. AND BE IT FURTHER ENACTED, That this Act shall take effect  
13 October 1, 2014.
