

Department of Legislative Services
Maryland General Assembly
2014 Session

FISCAL AND POLICY NOTE

House Bill 1428
Ways and Means

(Delegate Walker)

Student Health and Fitness Act

This bill requires all public elementary school students to be provided daily programs of physical activity totaling 150 minutes per week, including a *minimum* of 90 minutes per week of physical education. For any of the required minutes not spent in physical education, each elementary school must designate a physical activity leadership team to plan and coordinate opportunities for moderate to vigorous activity (including recess) to make up the remaining time. As applicable, a student's program of physical activity must be consistent with the student's Individualized Education Plan. The State Board of Education must adopt regulations necessary to implement the bill. The bill takes effect October 1, 2014, but a local school system may apply for an extension until July 1, 2017. A local school system that is granted an extension must have a plan to ensure compliance by July 1, 2017.

Fiscal Summary

State Effect: Any additional monitoring of local school systems' physical education programs by the Maryland State Department of Education (MSDE) can be accomplished with existing personnel and resources. General fund expenditures for teachers' retirement increase by an estimated \$1.4 million by FY 2020 (or a similar amount beginning as early as FY 2017 depending upon waiver decisions under the bill). These costs may be significantly higher depending on the personnel needs in other school systems.

Local Effect: Local school expenditures in three counties (Allegany, Montgomery, and St. Mary's) increase to hire additional physical education teachers for elementary schools. Depending on waiver decisions, local expenditures increase by as much as \$12.5 million in FY 2015 and as much as \$14.0 million by FY 2019. These costs may be significantly higher depending on the personnel needs in other school systems.

In addition, local school systems may need to lengthen the school day or spend less time on other subjects to provide additional time for physical education and physical activity. **This bill imposes a mandate on a unit of local government.**

Small Business Effect: None.

Analysis

Current Law: Every public school must have a program of physical education that is given in a planned and sequential manner to all students in order to develop their good health and physical fitness and improve their motor coordination and physical skills. The specific curriculum and course of study is set by each local board of education. Maryland regulations require physical education instructional programs to teach students how regular, moderate-to-vigorous physical activity contributes to personal health and enhances cognitive and physical performance on a variety of academic, recreational, and life tasks.

Background: The National Association for Sport and Physical Education (NASPE) finds that children between the ages of 5 and 12 should accumulate at least 60 minutes, and up to several hours, of age-appropriate physical activity on all or most days of the week. This daily accumulation should include, according to NASPE, moderate and vigorous physical activity with the majority of the time being spent in activity that is intermittent in nature. NASPE further finds that children should participate in several bouts of physical activity lasting 15 minutes or more each day, and that extended periods (periods of two hours or more) of inactivity are discouraged for children, especially during the daytime hours.

A national study by the Center on Education Policy on curriculum and instruction following implementation of the No Child Left Behind Act in 2002 finds that for many school systems, time devoted to tested subjects (including math and English language arts) increased while time devoted to one or more other subjects and activities, including lunch, physical education, and recess was reduced.

MSDE advises that physical education programs in the 24 local school systems vary widely. For example, some elementary schools provide 40 or 45 minutes of physical education per week, while a small percentage of public elementary schools in Maryland may provide as much as 120 minutes per week. The minimum and maximum amounts of time per week in physical education for elementary schools in each school system are shown in **Exhibit 1**. Three counties – Allegany, Montgomery, and St. Mary’s – do not provide 90 minutes of physical activity each week at any school. In an additional 13 school systems, the minimum number of hours per week is below

90 and therefore it is assumed that some schools in each system may require additional personnel to meet the bill's requirements.

Exhibit 1
Minimum and Maximum Minutes Per Week in Physical Education
in Public Elementary Schools
As of October 2013

<u>School System</u>	<u>Minimum</u>	<u>Maximum</u>
Allegany	40	45
Anne Arundel	45	90
Baltimore City	45	100
Baltimore	50	120
Calvert	90	90
Caroline	45	90

State Expenditures: Teachers' retirement costs are paid by the State based on local school system salaries from the second prior fiscal year. If additional teachers are hired to teach physical education beginning in fiscal 2015, teachers' retirement costs will increase beginning in fiscal 2017. However, if all local school systems take full advantage of the waiver provisions, costs do not increase until fiscal 2020.

Based on assumptions discussed below, the teacher salary base (excluding benefits) may increase by as much as \$10.0 million annually in fiscal 2015 if no waivers are granted or by \$10.9 million in fiscal 2018 if waivers are granted for each county. Thus, State teachers' retirement expenditures increase by \$1.4 million annually beginning in fiscal 2017 if no waivers are granted or by \$1.4 million annually beginning in fiscal 2020 if waivers are granted for each county in each year that waivers are authorized. These costs may increase significantly depending on the personnel needs of other school systems as discussed below.

Local Expenditures: The bill's impact on local school systems will depend on current physical education policies, which are determined by the local boards of education. The most significant impact will be on local school systems that provide less than 90 minutes of physical education per week for elementary school students, because those local school systems may need to hire additional physical education teachers to teach the additional classes. Cross-referencing the elementary school data shown in Exhibit 1 with data on the number of elementary schools in each system, it is estimated that one additional physical education teacher may be needed in 166 elementary schools in Allegany (14), Montgomery (133), and St. Mary's (19) counties in order to meet the 90-minute minimum established in the bill.

Based upon current salary and benefits costs per teacher in affected counties, and accounting for inflation, the total expenditure increase for local school systems amounts to an estimated \$12.5 million for fiscal 2015 if no waivers are granted, including \$1.1 million for Allegany County, \$10.2 million for Montgomery County, and \$1.2 million for St. Mary's County. The bill allows local school systems to apply for three-year waivers from the requirements. If waivers are granted for each local school system in each year, county salary and benefits expenditures increase by an estimated \$13.6 million in fiscal 2018, including \$1.2 million for Allegany County, \$11.1 million for Montgomery County, and \$1.3 million for St. Mary's County. Waivers could enable local school systems to make adjustments to their budgets and identify the most efficient ways to expand physical education programs.

Other school systems that provide a minimum of less than 90 minutes may also incur significant personnel cost increases depending upon the number of schools that fall significantly short of the 90 minute requirement under the bill.

Beginning in fiscal 2017, local school boards will be responsible for the actual normal cost of pensions for qualifying personnel. The teacher salary base (excluding benefits) may increase by as much as \$10.0 million in fiscal 2015 if no waivers are granted or by \$10.9 million in fiscal 2018 if waivers are granted for each county. If no waivers are granted for each county, local school system retirement expenditures increase by up to an estimated \$553,200 in fiscal 2017, or by approximately \$46,900 for Allegany County, \$451,600 for Montgomery County, and \$54,700 for St. Mary's County. If waivers are granted for each county in each year waivers are authorized, local school system retirement expenditures increase by an estimated \$560,700 in fiscal 2020, or by approximately \$47,500 for Allegany County, \$457,800 for Montgomery County, and \$55,400 for St. Mary's County. Local retirement expenditures may increase for other school systems based on potential personnel increases as discussed above.

Elementary school facilities are not expected to be a barrier to requiring 90 minutes per week of physical education. To provide elementary school students with additional time for physical activity, less time may be spent on other priorities, such as instruction in other subjects. It is assumed that this will not affect school finances, although the impact on students is unknown. Alternatively, local school systems could lengthen the school day for elementary school students. Any costs associated with lengthening the school day will depend on how the adjustment is implemented and cannot be precisely determined.

Additional Information

Prior Introductions: HB 168 of 2011, HB 196 of 2012, and HB 855 of 2013 each received a hearing in the House Ways and Means Committee, but no further action was taken on the bills.

Cross File: None.
