## 27. Year of Construction of Any Structures Proposed for Renovation, Restoration or Conversion 28. Comments Broadneck has a desperate need for stadium Bleacher replacement. Our current entire visitor bleacher section as well as a portion of our home bleachers are in a state deterioration and do not meet current Maryland code for bleacher safety. Both sections I am refereeing to were built and installed in 1983. In addition to the overall poor condition and lack of code standards our visitor bleachers no longer handles our needs for seating capacity. Broadneck High Schools visitor bleacher section are not only one of the countys oldest set of bleachers in regards to age but it is the smallest in terms of seating capacity in Anne Arundel County. The need to adequately provide seating for visiting spectators is a critical component to the overall supervision and safety of our athletic events. The Bond bill we are requesting will provide the funding to replace our current visitor bleachers and provide additional 585 seats for a total seating capacity of 845 for our visitors. Additionally, it will also provide funding to replace our current section of home bleachers that fail to me current Maryland Code safety standards. It will make Broadneck equitable to other schools in our county in regards to stadium seating capacity.
