House Bill 1170 (Delegate P. Young, *et al.*)
 Health and Government Operations

Behavioral Health Services Matching Grant Program for Service Members and Veterans - Establishment

This bill establishes the Behavioral Health Services Matching Grant Program for Service Members and Veterans administered by the Maryland Department of Health (MDH). Beginning in fiscal 2021, the Governor must include an annual appropriation of \$5.0 million for the program in the operating budget. **The bill takes effect July 1, 2019.**

Fiscal Summary

State Effect: General fund expenditures increase by \$5.0 million in FY 2021 to provide grants. Although not required, this analysis assumes funding is also provided in FY 2020. MDH can administer the program using existing budgeted resources. Revenues are not affected. **This bill establishes a mandated appropriation beginning in FY 2021.**

(\$ in millions)	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Revenues	\$0	\$0	\$0	\$0	\$0
GF Expenditure	5.0	5.0	5.0	5.0	5.0
Net Effect	(\$5.0)	(\$5.0)	(\$5.0)	(\$5.0)	(\$5.0)

Note: () = decrease; GF = general funds; FF = federal funds; SF = special funds; - = indeterminate increase; (-) = indeterminate decrease

Local Effect: None.

Small Business Effect: None.

Analysis

Bill Summary:

Definitions

“Eligible individual” means a service member, a veteran, or the spouse, child, or stepchild of a service member or veteran.

“Service member” means an individual who is an active duty member of the U.S. Armed Forces, a reserve component of the U.S. Armed Forces, or the National Guard of any state.

“Veteran” means a former service member who was discharged from active duty.

Behavioral Health Services Matching Grant Program

The program must award competitive matching grants to local nonprofit organizations to establish and expand community behavioral health programs that (1) serve the behavioral health needs of eligible individuals in the locality served by the nonprofit organization; (2) meet national standards; (3) integrate the delivery of mental health and substance use treatment; and (4) connect eligible individuals to appropriate community-based care in a timely manner on discharge from the community behavioral health program.

Maryland Department of Health – Requirements

MDH must establish (1) selection criteria to evaluate applicant proposals, including a positive scoring system that takes into account specified information; (2) application procedures; (3) a statewide system of outcome measurement to assess the effectiveness and adequacy of services provided by each nonprofit organization that receives a grant; (4) guidelines that require a nonprofit organization that receives a grant to bill third-party insurers or Medicaid; and (5) any other procedures necessary to implement the bill.

When awarding grants, MDH must give priority to proposals that best meet the established selection criteria, regardless of the proposal’s projected cost.

Nonprofit Organizations – Applying for and Receiving Grants from the Program

Nonprofit organizations with a mission to provide behavioral health services or provide services to eligible individuals are entitled to submit a proposal requesting a matching grant from the program. An eligible nonprofit organization must secure contributions equal to the amount of money requested from the program. Additionally, a nonprofit organization

that receives a grant from the program must submit any information that MDH determines is necessary for the statewide system of outcome measurement.

Reporting Requirements

By December 1, 2021, and annually thereafter, MDH must submit a report for the most recent fiscal year that includes the number of grants distributed, the funds distributed by county, information about grant recipients and the services provided through grant funding, and outcome data reported under the statewide system of measurement.

Current Law:

Veteran and Armed Services Member Suicide Reporting

Chapters 154 and 155 of 2018 require the Secretary of Health to publish an annual report on the suicides of veterans and members currently serving in the U.S. Armed Forces. The report may only include specified demographic information, the nature of service, and the method of suicide.

Maryland Veterans Service Animal Program

Chapter 416 of 2017 established the Maryland Veterans Service Animal Program. The program is designed to refer eligible veterans to selected nonprofit organizations to be paired with service dogs or support dogs and facilitate their training. One of the stated purposes of the program is to assist in the reduction of the Maryland veteran suicide rate.

Maryland's Commitment to Veterans

Chapter 555 of 2008 established Maryland's Commitment to Veterans within MDH and administered by the Behavioral Health Administration (BHA). The program assists veterans in coordinating comprehensive wellness and behavioral health services and directs veterans to federal services specifically available to veterans or to State resources when no federal services are available.

Background: The Defense Manpower Data Center reports that, as of December 31, 2018, there are 47,842 active duty military in Maryland. Additionally, in its 2018 annual report, the Maryland Department of Veterans Affairs reported that there are approximately 380,000 veterans living in Maryland.

Veterans are more likely to suffer from a myriad of health problems, including chronic pain, substance use disorders, chemical exposure disorders, and mental illness. The National Alliance on Mental Illness names three primary mental health concerns among

individuals who served in the military: post-traumatic stress disorder, depression, and traumatic brain injury. Unfortunately, there is no accessible state-level data to provide a comparison of these three mental health concerns between Maryland veterans and the overall veteran populations. It is commonly accepted that all three are highly prevalent across the veteran community. All three of these conditions are interrelated and can lead to other issues such as homelessness or suicide – issues of concern surrounding veterans.

Veterans have unique needs around mental health. Despite those unique needs, only about 22.3% of Maryland veterans utilized the federal Veterans Administration (VA) health care system in 2016. Even among veterans that use VA health care, there are mental health access issues. The VA reports outpatient data to compare access and quality of care at its VA medical centers to commercial care across the same regions. In the two measures intended to assess access to mental health services – acute and continuation antidepressant medication management – the Baltimore VA Medical Center performs well below the regional score.

State Expenditures: General fund expenditures increase by \$5.0 million annually beginning in fiscal 2021 as required under the bill. As BHA currently oversees Maryland’s Commitment to Veterans program, MDH advises that existing BHA staff will be responsible for administering this grant program, which can be handled with existing resources. Thus, the entire amount of the mandated appropriation will be used to provide grants to eligible nonprofit organizations. To the extent the full appropriation is not awarded as grants, unexpended funds revert to the general fund. Although discretionary, this analysis assumes that \$5.0 million is also provided in fiscal 2020.
