<p>The Baltimore City College Foundation exists to ensure the institutional sustainability of the legacy of excellence we know as Baltimore City College High School by funding capital projects, protecting existing programs, supporting new programs, and recognizing excellence in teaching. Its Board is comprised of graduates, parents and other stakeholders who are committed to maintaining City College as a rigorous academic magnet school for the families of Baltimore.</p>		

**11. Description and Purpose of Project** (Limit length to visible area)

Design plans include a renovation of locations within BCC for the direct purpose of sustaining, encouraging, and inspiring students in the arts. COMAR regulations regarding fine arts along with the City Schools Blueprint calls for schools to provide a well-rounded curriculum with arts that address the unique interests of students and thereby motivates their daily attendance. Renovations involve upgraded spaces for arts inclusive of instrumental music, choir, theatre, dance and relocated classrooms for piano and film. An art gallery will showcase student work while remodeled seating in the auditorium will improve the main theatre. This is an estimated \$4 million construction effort. The space is 10,000 square feet. Auditorium seating capacity on the main floor is 600. The current spaces used for this programming are inadequate to meet the rigor of an International Baccalaureate curriculum.

*Round all amounts to the nearest \$1,000. The totals in Items 12 (Estimated Capital Costs) and 13 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.*

COMAR regulations regarding fine arts along with the City Schools Blueprint calls for schools to provide a well-rounded curriculum with arts that address the unique interests of students and thereby motivates their daily attendance. There is abundant evidence to point to greater rates of attendance and engagement, higher achievement in other academic areas and greater well-being among students who participate in the arts.

At City College, the arts are valued as one of the core subject areas that comprise a truly well-rounded education. This is implicit in our mission as an IB World School and as a college preparatory high school. At City, the arts stand shoulder-to-shoulder with mathematics, English, science, history, and world languages not only because they help students gain skills that will benefit them in all of those disciplines but because they are worthy of study in their own right.

The arts are where students effort meets their passion. When students participate in the arts, they are faced with creative challenges that require full engagement of their kinesthetic, linguistic, emotional, interpersonal, and logical intelligences. And they employ these intelligences, not because they are forced to, but because they want to, because the making of art has inspired them to be brilliant without extrinsic motivation.

With this project City College seeks to expand curricular and extracurricular offerings for all students wishing to study drawing and painting, film, theatre, piano, band, vocal music and/or, dance.

The school expects to see increased scores on International Baccalaureate arts portfolio assessments, increased participation in the arts and, increased community engagement as students have more opportunities to show their work.
