11. Description and Purpose of Project (Limit length to visible area)

The City of Brunswick's water reservoir/storage tank site currently has a one (1) million gallon and 250,000 gallon storage tanks. The site also contains a failing three (3) million gallon reservoir. The configuration of the storage tanks, pumps, and distribution infrastructure does not allow required maintenance on the three (3) million tank. This has not always been a problem until a new development, now with 700 of the 1,500 homes built and connected, causes a lack of hydraulics (pressure & volume) to serve the newest homes when the three (3) storage tank is taken out of service. The proposed design includes new pipe infrastructure and additional pumps allowing sufficient pressurization utilizing only the 250,000 gallon tank providing water to all residents,

Round all amounts to the nearest \$1,000. The totals in Items 12 (Estimated Capital Costs) and 13 (Proposed Funding Sources) must match. The proposed funding sources must not include the value of real property unless an equivalent value is shown under Estimated Capital Costs.
