	<p>States, including Maryland, adopted a compliance provision to allow vehicle manufactures to meet the California Clean Cars GHG requirements by complying with the EPA GHG requirements. However, EPA has proposed to alter the national GHG standards. The proposed amendments incorporate the current compliance provision requirements as codified by California and removes conflict if EPA’s national GHG standards are altered as proposed.</p>

<p>August 2, 2018</p>	<p><b>Emergency/Proposed Regulation</b>  <b>DLS Control No. 18-214</b>  <b>Comptroller of the Treasury:</b>  <b>Sales and Use Tax: Sales and Use Tax:</b>  <b>COMAR 03.06.01.33</b></p> <p>The purpose of this action is to enforce a collection requirement that remote sellers without a physical presence in Maryland collect Maryland sales and use taxes for products delivered into Maryland. The recent Supreme Court ruling, South Dakota v. Wayfair, reverses a 1992 ruling on Quill Corp. v. North Dakota that said sellers only had to collect state sales taxes if they had a warehouse, office or sales representative in the state. The Office of the Comptroller is receiving inquiries regarding the impact the decision has on the Comptroller’s authority to compel remote sellers to collect Maryland sales and use tax on sales to Maryland customers. The Comptroller is charged with compliance and enforcement efforts related to the collection of the sales and use tax. 	<p>The amendment describes the method for identifying acute rehabilitation discharges from Maryland hospitals and hospitals located in the District of Columbia. As a result of the implementation of ICD-10 codes on October 1, 2015, the description of the method for identifying acute rehabilitation discharges must be revised in order to describe the process for obtaining the most accurate count of acute rehabilitation discharges, which are used to develop projections for the adult acute rehabilitation bed need. The projections are used to evaluate Certificate of Need applications that propose the establishment of a new acute inpatient rehabilitation hospital or the establishment of acute inpatient rehabilitation service at a general or specialty hospital. The chapter must accurately describe how the new projections will be developed.</p> <p>The commission indicates that an emergency regulation is needed because commission staff received a letter of intent on October 25, 2017 from an applicant that proposes the establishment of a new acute inpatient rehabilitation hospital in Maryland and, in its letter of intent, inquired about the commission’s plan to update acute rehabilitation bed need projections. The emergency amendment is needed in order for the chapter to accurately reflect the correct data sources to be used in the projections.</p>
