

MDCSCO

MARYLAND/DISTRICT OF COLUMBIA
SOCIETY OF CLINICAL ONCOLOGY

February 26, 2020

The Honorable Paul Pinsky
Chair
Senate Education, Health & Environmental Affairs Committee
2 West
Miller Senate Office Building
Annapolis, Maryland 21401

RE: SUPPORT: *Senate Bill 763: State Board of Physicians – Genetic Counselors - Licensing*

Dear Chair Pinsky and Members of the Senate Education, Health & Environmental Affairs Committee:

On behalf of the Maryland/District of Columbia Society of Clinical Oncology (MDCSCO), I want to thank you for the opportunity to provide these comments on *Senate Bill 763: State Board of Physicians – Genetic Counselors – Licensing*. Senate Bill 763 would require individuals that undertake the “practice of genetic counseling” to be licensed under the Maryland Board of Physicians. As the President of MDCSCO, I am committed, along with our members, to furthering our mission, which is:

1. To improve the quality and delivery of care in medical oncology in the State of Maryland and the District of Columbia.
2. To promote appropriate standards of care in oncology.
3. To cooperate with investigators conducting cancer research.
4. To assist in the continuing education of oncologists.
5. To educate the public, the government, insurance carriers, and other health care providers about appropriate prevention of cancer and current therapeutic options for patients with cancer.

We believe that this Senate Bill 763 aligns with this mission and we request your support for this bill. Genetic testing has become an integral part of cancer risk assessment and management. Given that as much as 10% of all cancers are hereditary, the earlier identification of individuals before a diagnosis of cancer allows for optimal surveillance and early detection and

prevention of cancer. Counseling involves evaluating a detailed family history, educating the patient about inheritance, and providing general information on cancer genetics. Appropriate training ensures that individuals will have the necessary knowledgeable in cancer genetics, screening, and preventive oncology. MDCSCO would be supportive of amending the bill to add clarifying language that would specify that in the course of providing genetic counseling, if the counselor were to find any indication of a disease or condition that requires diagnosis and treatment, the counselor would be required to refer the client to a licensed physician or other appropriate health care practitioner.

I thank you in advance for your time and I look forward to working with you during the 2020 Session.

Sincerely,

Paul Celano, MD FACP FASCO
