

HB1375 PUBLIC SCHOOL STUDENTS - VISION SERVICES AND THE VISION FOR MARYLAND PROGRAM

March 6, 2020

WAYS AND MEANS COMMITTEE

OPPOSE

Jeanette Ortiz, Esq., Legislative & Policy Counsel (410.703.5352)

Anne Arundel County Public Schools (AACPS) opposes **HB1375 - Public School Students - Vision Services And The Vision For Maryland**. This bill establishes the Vision for Maryland program in the Maryland Department of Health to provide eye examinations and eyeglasses to public school students who fail the required vision screening. Additionally, local boards of education and local health departments must provide eye examinations for specified students. The bill also creates a health specialist position in both the Maryland State Department of Education and the Maryland Department of Health to ensure that quality and effective school health services are delivered throughout the State.

Local school systems or local health departments are already required to provide hearing and vision screenings for all students in local public schools. Student health rooms at AACPS are staffed by personnel from the Anne Arundel County Department of Health, and it is this staff that conducts vision screenings at our schools.

A 2018 law passed by the General Assembly altered the notice requirements related to student hearing and vision screenings and required that notice and specified educational materials be given to parents/guardians for all students receiving hearing and vision screenings. For students who fail the vision screening, additional information must be provided, including 1) notice that the results of the screening indicate that the student may have a vision disorder; and 2) a recommendation that the student be tested by an optometrist or an ophthalmologist.

While this legislation is well-intentioned, it is unnecessary and AACPS has concerns with the requirement that county boards of education coordinate with the Vision for Maryland program to ensure that students receive eye examinations and, if necessary, eyeglasses. Such a responsibility does not fall on a county board of education. We believe that the responsibility to ensure that students receive eyeglasses, when necessary, would be best executed by the Maryland Department of Health or staff with the Vision for Maryland program as these are the entities who would be responsible for implementing the program as established under this bill.

Accordingly, AACPS respectfully requests an **UNFAVORABLE** committee report on HB1375.
