Dear Delegate Cox and Health and Government Operations Committee

Please support HB1167~ Maryland Nondiscrimination in Health Care Coverage Act

This is a post-born Life bill that prevents insurance companies from denying coverage for life-sustaining care because of covid infections.

All lives should be protected. I believe every Legislator should be protecting the right to live. Every life is precious. Each of us is alive because a loving mother gave birth and protected us. The unborn, young and seniors must continue to be protected.
