RE: SUPPORT OF HB 8 *Labor and Employment – Family and Medical Leave Insurance Program – Establishment (Time to Care Act of 2022)*

Dear Chair Wilson, Vice-Chair Crosby, and Members of the House Economic Matters Committee,

The need for access to paid medical & family leave became clearer nationwide during the COVID-19 Public Health Emergency. The American Cancer Society Cancer Action Network (ACS CAN) supports policies such as HB 8 that increase access to job-protected paid family & medical leave that can be used for cancer treatments, survivorship care, and caregiving as well as other illnesses.

In 2018, over 6 million workers in the U.S. had a history of cancer.ⁱ Cancer treatment is time consuming – often requiring time off from work for doctor’s visits, surgery and recovery, chemotherapy, and radiation. The flexibility to balance cancer treatment and employment is essential.

Studies show that cancer patients who have paid leave have higher rates of job retention and lower rates of financial burden.ⁱⁱⁱⁱ Yet not all cancer patients, survivors and caregivers who work have access to paid leave, and without it they risk losing employment or not getting the care they need.

The American Cancer Society Cancer Action Network (ACS CAN) conducted multiple surveys in 2017-2019 to explore this issue amongst cancer patients, survivors, and caregivers.^{iv} The survey results showed that access to paid medical/family leave makes an important difference for cancer patients, survivors, and their caregivers; contributing to positive outcomes like being able to complete treatment, manage symptoms and side effects, and afford treatments.

The survey results also showed that, access to paid leave is a health equity issue. Respondents who reported having issues with cancer/caregiving and their job – including the quality of their work suffering, having to take two or more days off work in a row, or having to leave work early – most often tended to be those in lower income households, those with lower levels of education, younger respondents, and those working in smaller companies.

Additionally, those respondents who had paid medical/family leave were less likely to report experiencing problems related to financial pressures than those who did not have it. HB 8—Time to Care Act of 2022— increases access to job-protected paid family & medical leave by creating a statewide paid family and medical leave insurance program and insurance fund to provide up

to 12 weeks of benefits to a covered individual taking leave from employment due to specified personal and family circumstances.

ACS CAN applauds the Maryland General Assembly for addressing the need for paid family and medical leave. We ask for a “favorable report” and encourage swift passage of HB 8.

I can be contacted at jocelyn.collins@cancer.org or **301-254-0072** with any questions.

Sincerely,

A handwritten signature in cursive script that reads 'Jocelyn I. Collins'.
