Submitted by Laurel Peltier, MAP & Energy Advocates

Marylanders Against Poverty (MAP) strongly supports HB108, which sets energy performance benchmarks for DHCD and increases DHCD's weatherizing funding for low-income residences. Twenty percent of Maryland's families are low-income with average incomes of \$16,000 per year. Seniors are 41% of this target.

Problem:

Budget-busting BGE, Pepco, SMECO, Delmarva utility bills. 13% energy burden utility bills are for 400,000 families in the "low income" target. Avg, utility bills are roughly \$2,000 per year. After rent, (70% of this target are renters) there's not enough cash left for food, meds, clothing, and life.

Leaky homes coupled with very low participation rates for low-income weatherization. DHCD has a big job, and it's tricky, and increased focus & metrics is greatly needed to improve results.

Time is running out. It's estimated to take 130 years to retrofit this target's homes with today's DHCD processes and funding levels.

Solution is HB108:

1. Set measurable, accountable target to decrease the energy usage for the target by 1%
2. Shrink time to 13 years, from 130 years, for most low-income homes to be made energy efficient.
3. Increases funding by encouraging Maryland to access more state, federal funding sources.

HB108 is a key lever to help DHCD and Maryland achieve its clean energy goals. We must focus on and ensure that low-income homes are more energy efficient. Then we can realistically reach 100% emission-free.

MAP appreciates your consideration and urges the committee to issue a favorable report for HB108.

Marylanders Against Poverty (MAP) is a coalition of service providers, faith communities, and advocacy organizations advancing statewide public policies and programs necessary

to alleviate the burdens faced by Marylanders living in or near poverty, and to address the underlying systemic causes of poverty.
