

SB 0523 - Unfavorable

Every year Maryland representatives erode the federal rules of law on illegal immigration because they deny the definition of “illegal”. They trot out the same paid representatives from the various Maryland pro illegal immigrant organizations and agencies and persons in the Maryland judiciary - who really should know better. The Supremacy Clause is still in the Constitution. They cry. They tell you how altruistic their efforts are and what non-Americans they are helping. The reality is that all those involved in creating and getting pro illegal immigration legislation passed in Maryland don't give a toss about the taxpayer. That's just the guy who is handed the bill to pay for their schemes to aid and abet current illegal immigrants and attract more of the undocumented to the tune of billions of Maryland tax dollars.

Here, Ms. Kagan's bill SB 523 is a newly crafted shiny magnet to attract more of the undocumented. Come to Maryland illegally and you will receive professional credentials. If an immigrant cannot come to this country through legal channels, why should they receive professional credentials of any sort? This is job creation for persons who are not yet legal participants in the American socioeconomic system.

Does this committee not understand that Americans are watching, because of the mishandling of covid, other Americans being forced out of their government and private business jobs? Not only should job creation should be solidified for Americans starting in the high schools but SB 523 has the potential to usurp jobs from Americans and legal immigrants.

SB 0523 is yet another step to legitimize the illegal, the undocumented. The language in this bill, “an immigrant if the individual meets certain requirements” is both vague and deceptive. But ILLEGAL IS ILLEGAL. Legislation that benefits the illegal immigrant's position is a slap in the face to the legal immigrant and the American worker.
