

HB0050

I vehemently oppose this bill and it must be stopped immediately.

In requiring "licensed hospitals, hospital directors, and hospital governing boards to authorize within the hospitals the performance of any medical procedure that results in artificial insemination, sterilization, or termination of pregnancy or to refer to any source for these medical procedures" this bill takes away the conscience rights of all hospital directors, governing boards and health care providers who would be forced to be involved in these procedures.

Health care workers have already been forced against their will to take abortion-tainted COVID shots or lose their jobs. What good could come out of a bill that will force similar consequences. Our health care system is already stressed to due to these draconian measures and many are working short-handed. Stop trying to force more procedures that obviously violate the consciences of many health care workers whose first job is to do no harm.

Cancel this bill now.
