

To whom it may concern:

I am in not in favor of HB1084. Our state should not be spending any money on a vaccine passport system that is not supported by its constituents. Passports do not stop the spread of this virus. Also, there is significant risk to privacy of medical information if the data is compromised, like what happened earlier this year to the MD Dept of Health. There are so many other places this money could be spent, such as infrastructure, schools, etc.
