

HB1084
UNFAVORABLE
Amy Willey

Using mobile technology to track anyone's COVID immunization record is an absolute violation of all of our freedom. My medical business is simply that, *my* business, no one else's. It is unlawful to discriminate against anyone, including vaccination status. Vaccine passports continue to be withdrawn globally, it is shameful Maryland is still pushing for this lunacy.

Giving pharmacists, assistants, and anyone else the ability to perform any kind of medical procedures or vaccinations on a child 3 years and older without parental consent is a violation of my parental rights. Pharmacists and their assistants are not doctors and do not work in doctor's offices, nor are they the parent to *my* children.
