

HB1084: COVID-19 Response Act of 2022

UNFAV

Kara Fisher

Dear Chair, Vice Chair and HGO Committee:

I ask you to oppose HB1084 and a vaccine passport system.

A system like this is **unnecessary**. It will be an expensive proposition to design, test and implement a digital system and marketing plan. There is no need for any business or organization to see a mobile vaccine record.

A system like this is **discriminatory** against those who will not have the means to acquire a mobile phone or share this data via a mobile device.

A system like this is **risky** as it puts aggregated confidential medical information in one place where it could be vulnerable to hackers.

In addition to opposing the digital vaccine passport, I feel it is **inappropriate for poorly-trained pharmacy techs to vaccinate toddlers** as this bill proposes.

Thank you.

Kara Fisher
