

UNFAV (HB1084)

I am writing in support of bills HB 779, 799, and 1358. As a family we have witnessed first-hand discrimination for choosing not to vaccinate our previously covid infected children. 14 months after having the vaccine I am still searching for answers to the illness it created. This vaccine is three times more likely to kill children than covid itself. We have a right to choose our path without decimation from school.

Thank you for your time,
