

During this pandemic the use of COVID-19 testing was totally abused because testing was done when zero illness was felt by individuals. Which is not ethical and causes expenses that need to be borne by Maryland citizens. My children who are/and were college students had to get tested every two weeks, so that they could attend classes. I had to get tested to go into a Maryland courthouse and attend a musical event; all while I did not feel ill at all. It demonstrated that the state of Maryland was abusing testing. The medical community has always looked at medical testing without cause as unethical. I also object to the surveillance that is taking place regarding COVID vaccines, once tested by my insurance company for COVID, I was hounded by the State of Maryland via cell phone texts; even after I requested a stop. (It stopped for one week and started up again.)
