

Dear Delegates Pena and Pendergrass and members of the Maryland House Health and Government Operations

As a Defender of truth, freedom, and children's health I strongly oppose HB1084

I oppose any vaccine passport (or any form of Social Credit System) because this bill reflects discrimination, government control, surveillance, and an attack on one's physical and mental health.

Let's say that COVID-19 vaccine passport is a voluntary thing than why is the state involved? Is it because when the state wants it to be required, or MANDATED it will have the full structure already there and ready to go?

There is NO PLACE for Vaccine Passports as our medical information is supposed to be private and not used to divide and segregate the population into vaccinated and unvaccinated.

I recently had to eat my lunch on a hallway next to a potty because I wasn't vaccinated despite that the CDC has said that the vaccinated can both contract and spread the SARS-2 virus. As a survivor of Communism, I ask you to mandate freedom and not vaccine passports.

Politicians should NOT have the authority to ORDER and vaccinate people, especially our children—even more so without parental or guardian informed consent.

Our medical information should be safely guarded, but by putting them in a central government database, we are unnecessarily exposing them to being hacked and stolen.

Moreover, Covid is NO longer a threat, but we do have a pandemic of mental illness. Eight students in Montgomery County died to suicide, overdose, and homicide in the last two months, yet thankfully no child died of Covid in two years. Please spend our tax dollars on mental health treatment and not useless vaccine passports and contact tracing. Kids urgently needs money to be invested for fun activities as field trips, sports, music, arts, learning to farm, prom parties, day trips to beach and skiing during winter etc.

My Covid recovered husband was forced to get vaccinated to keep his job. Hours after vaccination he spiked a 103 fever, crucial migraine and was referred immediately to the emergency room with stroke symptoms. The next Covid shot could kill him.

Natural Immunity has been demonstrated to be superior in its robustness, breadth of protection, and duration than that allegedly offered by the COVID shots.

HB 1084 is an attack on our freedom and privacy I respectfully ask to oppose it.

Thank you,

Daniela D'Orazio
