Subject: PLEASE SUPPORT HB618: PARENTAL RIGHTS BILL

Hello, please support HB618. Parents love and support their children and should know and be involved in the decision making that could have short and long- term effects on their children.

Maryland schools should concentrate on teaching our children and let their parents and doctors decide on medical treatments.

Parents have the right to decide the care of their children PERIOD. Whether its in school or out of school which includes the full content of information to which they are exposed to and medical and mental administered.

IF YOU ARE PARENT, EVER BEEN A PARENT, EVER WANT TO BE A PARENT then you should understand how frustrating it is when strangers want to act like they know what is best for you and your family.

PLEASE SUPPORT HB618.

Thank you

Karen
