

I realize that your worldview thinks it is the role of the government to educate children. But the Bible says that it is the parent's role, and as such we chose to homeschool our children. If we wanted involvement from the state in their education, we would put our children in government funded schools. We already have oversight from the county, and your bill is such a waste of our time and money both before it passes and more so after. You are just giving us one more reason to take our income to a different state. This bill needs to be voted down.

Steve Miller
