SB 282

Maryland Forestry Education Fund - Establishment

Date: February 8, 2023

To: Budget & Taxation Committee

Position: Support

From: Doug Myers, Maryland Senior Scientist

Chesapeake Bay Foundation (CBF) **SUPPORTS** SB 282 which establishes a Maryland Forestry Education Fund to enhance and expand Maryland Forestry Foundation's education programs for forest landowners.

Much of Maryland's forest land is in the possession of private landowners. The decisions these landowners make can have significant consequences for the environment including water quality protection, fish and wildlife habitat and mitigation of greenhouse gases among others. SB 282 expands the scope of forest landowner training programs by providing up-to-date information on sustainable forestry practices and ecosystem services.

Landowners, forestry boards, and local governments can integrate this information into forest management plans that protect forest functions while maintaining profitability of the forest resource. CBF especially welcomes education on climate science, forest conservation, and urban forestry as these topics are often missing from traditional forest education programs.

Building local capacity, institutionalizing sustainability, and peer-to-peer education are all tenants of a successful model for regenerative natural resources management. The Chesapeake Bay Foundation appreciates this legislation's efforts to improve forest stewardship through forestry education.

CBF urges the Committee's FAVORABLE report on SB 282.
