

I am testifying favor of HB 924 Sewage Treatment Plants sponsored
by Delegate Grammer.

My name is Francis Taylor. I am President of the North Point Peninsula Council, a civic organization representing zip code areas 21219 and 21052 since 1971. Our residents reside on nearly 6 miles of Back River shoreline. On our side and the opposite shoreline, businesses and residents have been adversely affected by sewerage discharges and pest insects. Long term oversight options of the Back River Waste Water Disposal operation, and others like it, have to be in place. This is especially necessary where continued violations are documented. Thank you for considering my testimony
