

Favorable with Amendments – HB0102 Real Property - Actions for Possession - Pet Protections

I'm not sure using the MD Agriculture's site as a repository for this information is the appropriate place.

The bill only addresses cats and dogs. Many people have many other types of pets, which the landlord may or may not have approved, such as pigs, rabbits, hamsters, birds, and snakes. I believe any animal the tenant included in their living space should be included in this bill.

No pet left behind!!

I'm in favor of this bill and strongly urge the legislators to also consider my testimony, make the recommended changes and support this bill.

Thank you.
