

Dear Delegates,

As a State Retiree, employed for 40 years, I strongly encourage you to vote for HB0670

I have compared my drugs with proposed Medicare D plan, and my medications and premium will be affected in a negative way. My premium under the present Rx Plan, is \$88.34, which includes my husband and myself. The Medicare D plan, will be at least \$130 plus for each of us.

My drugs in the Medicare D plan will also be impacted. I will have to drop 2 special drugs. Presently, I am charged \$80 for 3 months for those drugs. They will not be covered under the Medicare D plans. Our present plan never questions our medications prescribed by our Doctors.

Another negative impact of the proposed 1/1/25 loss of our Rx Plan is that we as Seniors will annually have to review different plans to ensure that our medications are covered, compare costs, etc. Realistically, how do you expect Seniors in the 80's and 90's go through this task? I am afraid that many will not make the closing date, due to age, mental ability, no family members and no computer skills and therefore lose their coverage. Presently, our coverage rolls over each year preventing that terrible result.

Once again I urge you to vote for HB0670. Our future is in your hands.

Thank You,

Regina Amoss-Poisal
