Annapolis, MD 21401

Dear Economic Matters Committee:

My name is Josh Malasheskie and I am Deaf. I live in Frederick County.

I am writing to ask you to support **HB 426 - Open Captioning Movie Bill**, sponsored by Delegate Harry Bhandari. This bill will require all motion picture houses to offer closed captioning for each screening of a motion picture and require that certain motion picture houses provide open captioning for at least two screenings each week.

Captioning, also known as same-language subtitles, benefits everyone who watches videos (children, adolescents, college students, and adults). More than 100 empirical studies document that captioning a video improves comprehension of, attention to, and memory of the video. Captions are particularly beneficial for persons watching videos in their non-native language, children and adults learning to read, and persons who are deaf or hard of hearing.

Most importantly, the bill provides communities with the assurance and peace of mind that they have access to the movie without using devices or other methods same as other people who go to the movie.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Sincerely,

Josh Malasheskie

Most importantly, the bill provides communities with the assurance and peace of mind that they have access to the movie without using devices or other methods same as other people who go to the movie.

Captions will help everyone. A lot of “native” American English speakers don’t understand the difference between “you’re” and “your”, etc. Captions during movies will help people correct their grammar.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Sincerely,

Reem Mansour

My name is Betsy Marcus and I am Hearing. I live in Montgomery County.

I am writing to ask you to support **HB 426 - Open Captioning Movie Bill**, sponsored by Delegate Harry Bhandari. This bill will require all motion picture houses to offer closed captioning for each screening of a motion picture; and require that certain motion picture houses provide open captioning for at least two screenings each week.

Captioning, also known as same-language subtitles, benefits everyone who watches videos (children, adolescents, college students, and adults). More than 100 empirical studies document that captioning a video improves comprehension of, attention to, and memory for the video. Captions are particularly beneficial for persons watching videos in their non-native language, for children and adults learning to read, and for persons who are deaf or hard of hearing.

Most importantly, the bill provides communities with the assurance and peace of mind that they have access to the movie without using devices or other methods same as other people who go to the movie.

As a hearing person, I enjoy movies that are open captioned, because sometimes my hearing is not as good as it should be or if the character has an accent, it definitely helps me understand the dialogue.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Sincerely,

Betsy Marcus

As a Bilingual Speech Language Pathologist, we highly recommend clients to read as a means to learn pronunciation of words as well to help with comprehension of language and vocabulary development. Our English language Learners are also advised to use closed captioning as a means of advancing they're learning. This is a highly beneficial feature that can reach many well deserving individuals.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Dear Economic Matters Committee:

My name is Connor McAlister and I am a person with a neurodivergent, auditory processing disorder. I live in Baltimore City.

I am writing to ask you to support **HB 426 - Open Captioning Movie Bill**, sponsored by Delegate Harry Bhandari. This bill will require all motion picture houses to offer closed captioning for each screening of a motion picture; and require that certain motion picture houses provide open captioning for at least two screenings each week.

Captioning, also known as same-language subtitles, benefits everyone who watches videos (children, adolescents, college students, and adults). More than 100 empirical studies document that captioning a video improves comprehension of, attention to, and memory for the video. Captions are particularly beneficial for persons watching videos in their non-native language, for children and adults learning to read, and for persons who are deaf or hard of hearing.

Most importantly, the bill provides communities with the assurance and peace of mind that they have access to the movie without using devices or other methods same as other people who go to the movie.

I have an auditory processing disorder which, for me, means that I really struggle to understand what people are saying when there are other noises. As a result, movies are really hard for me to enjoy without open captioned movies. If the closed captions device is not working, I end up missing half the movie dialogue which is really saddening. Because of this need, I have almost completely stopped going to movie theaters. When I lived in NY, my local theater had occasional showings with open captioned movies, and it was seriously a game changer for me. I finally got to enjoy the movie experience like everyone else. I would love it if I could experience that here in Maryland.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Annapolis, MD 21401

Dear Economic Matters Committee:

My name is Lakeya McCoy and I am Hearing. I live in Montgomery County.

I am writing to ask you to support **HB 426 - Open Captioning Movie Bill**, sponsored by Delegate Harry Bhandari. This bill will require all motion picture houses to offer closed captioning for each screening of a motion picture; and require that certain motion picture houses provide open captioning for at least two screenings each week.

Captioning, also known as same-language subtitles, benefits everyone who watches videos (children, adolescents, college students, and adults). More than 100 empirical studies document that captioning a video improves comprehension of, attention to, and memory for the video. Captions are particularly beneficial for persons watching videos in their non-native language, for children and adults learning to read, and for persons who are deaf or hard of hearing.

Most importantly, the bill provides communities with the assurance and peace of mind that they have access to the movie without using devices or other methods same as other people who go to the movie.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Sincerely,

Lakeya Mccoy  
Lmccoytowson19@gmail.com

My name is Mona Blanchette McCubbin and I am Deaf. I live in Washington County.

I am writing to ask you to support **HB 426 - Open Captioning Movie Bill**, sponsored by Delegate Harry Bhandari. This bill will require all motion picture houses to offer closed captioning for each screening of a motion picture; and require that certain motion picture houses provide open captioning for at least two screenings each week.

Captioning, also known as same-language subtitles, benefits everyone who watches videos (children, adolescents, college students, and adults). More than 100 empirical studies document that captioning a video improves comprehension of, attention to, and memory for the video. Captions are particularly beneficial for persons watching videos in their non-native language, for children and adults learning to read, and for persons who are deaf or hard of hearing.

Most importantly, the bill provides communities with the assurance and peace of mind that they have access to the movie without using devices or other methods same as other people who go to the movie.

Open captioning has been instrumental in providing me with educational opportunities and enhancing my understanding of the world. Beyond merely enjoying movies, the inclusion of captions has opened up a gateway for me to comprehend the nuances of communication, contributing to improved English language skills and reading proficiency. Advocating for open captioning in movies is not just about accommodation; it is about creating a more inclusive and enriching environment for everyone, regardless of their hearing abilities.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Sincerely,

Mona Blanchette McCubbin

Most importantly, the bill provides communities with the assurance and peace of mind that they have access to the movie without using devices or other methods, the same as other people who go to the movie.

As a DDA meaningful day program provider on the Eastern Shore, open-captioning movies would increase opportunities for the deaf people we serve to have community-integrated options for entertainment in their local area, where we are already limited by being in a rural area of the state.

Thank you for your time and attention to this important matter and I appreciate your support on HB 426.

Sincerely,

Ivy McIntyre
