

March 1<sup>st</sup>, 2024

Delegate Marc Korman, Chair  
House Environment and Transportation Committee  
Room 251, House Office Building  
Annapolis, MD 21401

**RE: HB 924 – FAVORABLE – Transportation – Regional Transportation Authorities**

Dear Chair Korman and Members of the Committee:

The Maryland Transportation Builders and Materials Association (“MTBMA”) has been and continues to serve as the voice for Maryland’s construction transportation industry since 1932. Our association is comprised of 200 members. MTBMA encourages, develops, and protects the prestige of the transportation construction and materials industry in Maryland by establishing and maintaining respected relationships with federal, state, and local public officials. We proactively work with regulatory agencies and governing bodies to represent the interests of the transportation industry and advocate for adequate state and federal funding for Maryland’s multimodal transportation system.

House Bill 924 would establish regional transportation authorities in three regions of Maryland—the Baltimore Region, the Capital Region, and the Southern Maryland Region to develop and implement congestion mitigation, long-range regional planning, recommend transportation priorities, allocate funds for projects, recommend the use or changes in use of tolls, among other duties. It also creates funds for each region that consist of money appropriated from the State Budget.

MTBMA strongly supports HB 924 because it addresses a critical need for funding regional and local transportation projects across all modes. We greatly appreciate the sponsor for introducing this bill because this is a concept that we have long argued for in Maryland. We see this as a proven model in ensuring regional transportation improvements. Virginia has used regional transportation authorities for years, which have been very successful. The Northern Virginia Transportation Authority for example, contributes over \$400 million in project funding annually. It meets a critical need to fund regional projects that are part of approved regional plans, with a portion of those funds going to localities to direct to local projects based on their needs. The funding potential is significant—based on Virginia’s experience, with \$400 million a year, over a 6-year capital budget cycle, this could provide \$2.4 billion in additional funding if Maryland followed a similar path.

Maryland is facing a current budget shortfall of \$3.1 Billion just to keep the current pipeline of projects funded through the Transportation Trust Fund, and it is widely recognized that the current

pipeline is not sufficient to meet Maryland's needs or keep transportation workers employed. This approach moves Maryland beyond over-reliance on the Motor Fuel Tax and other limited funding streams, to allow expanded investment that would ease commutes and create tens of thousands of new jobs for Maryland's construction industry workers. Given Maryland's diverse landscape, having an RTA program would really help narrow in on the transportation needs of a specific region so the rest of the State is not covering the cost. There is often the argument that within certain regions of Maryland, residents foot the bill for projects they will never use.

We appreciate you taking the time to consider our request for a **FAVORABLE** report on HB 924.

Thank you,
