

The People of Maryland do NOT need unelected bureaucrats in control of all aspects of our lives. Tell Governor Globalist Moore NO, say not to any and all #Agenda2021 Agenda30 Agenda40 +++ unsustainable, highly unaffordable and extremely unreliable programs. Is anyone asking what the real costs are? What are the measurable goals and measurable outcomes? If anyone was, they'd see countries like Sweden backing out and moving on from these types of expensive and unproductive programs. Sustainability has to be equally affordable and reliable, none seem to be those two important things that Maryland taxpayers deserve. SAY NO to this program and to those lining up to line their pockets with our hard-earned money.

How much will this cost each citizen? Too much, with zero outcome to benefit us. Maryland needs to start creating products not illusions.
