Hon. Regina T. Boyce, Vice Chair  
Environment and Transportation Committee  
Room 251, House Office Building  
Annapolis, Maryland 21401

**Organization:** The American Council of Engineering Companies/MD (ACEC/MD)  
**Bill:** HB 1284 - Wetlands and Waterways Program - Stream Restoration Projects  
**Position:** Oppose

Chairperson Korman and Vice-Chair Boyce,

The American Council of Engineering Companies/MD (ACEC/MD) is the representative organization for approximately 90 consulting engineering firms of various sizes across the state. These firms play a crucial role in serving both the public and private sectors by actively participating in the design and development of essential infrastructure such as public water and wastewater systems, bridges, highways, building structures, and environmental projects.

Our organization's member firms collectively employ approximately 7,000 individuals statewide, and approximately forty percent of ACEC/MD's membership is comprised of certified small, minority-owned, or women-owned businesses, reflecting our commitment to diversity and inclusion within the engineering industry. We respectfully **oppose** this bill.

We believe the proposed legislation will impose unnecessary environmental regulations and bureaucracy. While environmental responsibility is crucial to engineers, overly restrictive measures without considering the practicalities of engineering projects will slow down development and increase costs. The proposed legislation will not only hamper the efficiency of engineering businesses, but it will also negatively affect the public and clients who rely on those services.

For any comments, inquiries, or further information, please do not hesitate to contact me at [cfaison@acecmd.org](mailto:cfaison@acecmd.org).

Respectfully,

Chad Faison  
Executive Director  
ACEC/MD
