

HB0414 – UNFavorable

Nelda Fink

MD District 32

This is too vague. And doesn't even suggest it will present 2 sides to economics – the democratic spend all you can and tax the cahoots out of the tax payer while we inflate the economy by simply printing more money side, and the opposing side which is a free market and free money society with currency being based on a solid valuable such as gold. No curriculum has been suggested and this could easily take off to become another push supporting Bidenomics. No thank you!

Education needs to present all aspects of the topic being presented. An excellent resource for economics is the Mises Institute - <https://mises.org/>

I adamantly oppose this bill.

Thank you.
