RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

My name is Roni Dinkes, and I have been the audiologist at Johns Hopkins Bayview Medical Center for the last 26 years. I work with both pediatrics, adult and geriatric patients.

I have been both the past president and currently a member at large for the Maryland Academy of Audiology (MAA). The reason I am a member of MAA is because: Audiology is their priority as well as, maintaining the highest level of professionalism and education in Audiology in the state of Maryland.

I firmly believe The Maryland Academy of Audiology should be the only entity nominating and appointing audiologists for the Board of Examiners. The Maryland Academy of Audiology will ensure the Secretary of Health and Governor has at least 3 qualified, professional audiologists for each open BoE audiology seat.

Thank you for your support of SB 714 legislation.

Sincerely,

Roni E. Dinkes, AuD

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

My name is Donna Pitts, and I am an associate professor at Loyola University Maryland and a practicing audiologist in the state of Maryland. In this capacity, I teach/train students to become autonomous professional providers within their scope of practice. Additionally, I am the educational audiologist at the Maryland School for the Blind, a private, but publicly funded school. In this capacity I see children from 3-21 who are deaf/blind. Services that I provide there include managing all types of technology (hearing aids, cochlear implants, and classroom amplification systems). I also train staff about the types of technology their students use and push in to classrooms where children who use any technology are being taught on a monthly basis. I accompany deaf/blind students on Orientation and Mobility (O&M) to ensure that their devices perform well enough for students to navigate travel. Finally, I am a member of the Maryland Academy of Audiology (MAA). I have been active in MAA since it's inception and have served as President, Secretary, Member at Large (current position) and Convention Chair (all multiple times).

The Maryland Academy of Audiology is a professional society of audiologists, practicing in a variety of environments, who are dedicated to serving individuals with hearing and balance disorders. The MAA enhances the ability of members to achieve career and practice objectives by fostering professional autonomy, providing quality continuing education, and increasing public awareness of hearing and balance disorders and the value of audiological services. The MAA sets standards for audiologists in the state of Maryland and we are often at the forefront of these standards and other states often look to us for guidance in their own states. I am also providing a link to our website so that you may peruse all of the resources we provide to our membership: <https://www.maaudiology.org>.

As a member of the MAA leadership, I feel strongly that the Maryland Academy of Audiology best represents audiologists in Maryland and should be the body to nominate candidates for open Board of Examiners seats, as opposed to the Board of Examiners or another organization offering candidates. We are for, by and of audiologists in the state of Maryland and should have autonomous ability to choose our representation on the BOE.

The language of SB 714 is intended to ensure that the ONLY audiology professional association in the state of Maryland, which happens to be MAA, nominates audiologists to represent *audiologists* on the Board of Examiners (Audiologists, Hearing Aid Dispensers, Speech-Language Pathologist, and Music Therapists). It also ensures that the Secretary of Health and the Governor have at least 3 qualified audiologists for each open BoE position, does not prohibit individuals from self-nominating, and mimics other professions' (Hearing Aid Dispensers, Music Therapists and ENTs) nominations. Therefore, audiologists should be able to nominate/appoint a representative from its choosing.

Again, I wish to thank you for your support of SB 714 legislation.

Sincerely,

A handwritten signature in black ink, appearing to read 'DPitts', with a red horizontal line underneath the signature.

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

I am an Audiologist practicing in the State of Maryland, and I am writing this letter in support of SB 714, which addresses appointment of audiologists to the State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists. I feel strongly that Audiologist members of the Board should be nominated by a separate professional agency, such as the Maryland Academy of Audiology, rather than by current members of the Board itself.

I recently moved to Maryland from Arizona, where I graduated with my Doctor of Audiology degree from the University of Arizona in 2022. My first experience with the Maryland Board of Examiners took place when I attempted to transfer my Audiology license from Arizona to Maryland under the Military Spouse Licensing Relief Act. My initial impression of the Maryland Board of Examiners is that they are in a period of transition and reorganization. As such, I feel that the current Board may not be in a good position to nominate strong Audiologist members to represent the field of Audiology in its mission to “enhance the quality of the hearing and speech health care provided to the citizens of Maryland.”

I am an early career professional, currently practicing Audiology with Kaiser Permanente Mid-Atlantic, in a busy medical setting where I assess, diagnose, and treat pediatric and adult patients with hearing, balance and related disorders. Because I am new to this position and to the State of Maryland, I depend on my national and state professional organizations, including membership in the Maryland Academy of Audiology, to guide my practice, create a network of professional contacts, and establish myself as a qualified and competent practitioner in my new setting. I have found the Maryland Academy of Audiology to be a dependable resource for professional education, public awareness, and current legislative information in a timely and organized manner.

Additionally, I understand that the other professions represented on the State Board of Examiners for Audiologists, Hearing Aid Dispensers, and Music Therapists nominate their members via their own respective professional organizations. It would follow, logically, that Audiologists should follow the same convention, not only for consistency, but to uphold the highest possible professional and ethical standards by avoiding potential conflicts of interest. This bill, if signed into law, would allow the Maryland Academy of Audiology, as the state’s representative professional organization for Audiology, to ensure that the Secretary of Health and the Governor have at least 3 qualified audiologists nominated for each open Audiology seat on the Board, in addition to any candidates who may choose to self-nominate for the positions.

As a new Audiologist in the State of Maryland, I take a strong interest in statewide professional issues and legislation pertaining to my practice. I sincerely hope that this bill and its comprised changes will advance the State Board of Examiners’ ability to ensure that “qualified and competent audiologists, hearing aid dispensers, speech-language pathologists and music therapists are licensed to practice in the State of Maryland.”

Thank you for your support of SB 714 legislation.

Sincerely,

Carrie Ann Moritz Clancy, AuD

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

I am writing in support of the legislation proposed by the Maryland Academy of Audiology. I work in private practice in Glen Burnie, Maryland serving patients of all ages. I perform audiologic evaluations, hearing aid fittings and follow-ups, tinnitus assessments, cochlear implant candidacy evaluations and programming, and cerumen management.

I am in my first year of practice, but I have been a member of MAA for the past two years. I joined during my fourth year externship, and had the opportunity to attend the MAA convention the past two years. In this short amount of time, it was clearly evident how important MAA membership is for continued education and furthering the field of audiology. MAA promotes the autonomy of audiologists to provide hearing and balance care, and to empower audiologists to be a part of legislative action that furthers the field of audiology. MAA also provides quality continued education for its members through the MAA convention. The speakers at the convention educate on the newest research available on how we can tailor practices to optimize patient care and outcomes.

I belong to MAA as its focus is on audiologists in our state and how we can better ourselves as practitioners and advocates for audiology. MAA focuses on pursuing positive change in our state and has direct implications on our licensure. It also allows connection with other audiologists in the state for collaboration. I feel that MAA is a better fit for myself than other national organizations, as it works tirelessly to advocate for audiologists in my home state, and successfully implements positive change.

The SB 714 legislation would ensure that the audiology state professional organization, MAA, is nominating qualified audiologists to the Secretary of Health and Governor to be appointed to the Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists. This bill would allow for audiologists to better represent themselves on the board, similarly to how the other professionals on the Board of Examiners are nominated and appointed. This bill would ensure that at least 3 qualified audiologists are presented to the governor whenever an opening on the

Board of Examiners arises. This also will allow individuals to self-nominate for consideration when a position opens.

Thank you for your support of SB 714 legislation.

Sincerely,

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

Good day. My name is Kari Harsh, and I am an audiologist in a private practice in western Maryland. We serve a largely rural area, ensuring best available hearing and balance care for our otherwise underserved patients. I am also a member of the Maryland Academy of Audiology (MAA). The Academy represents the best and brightest of our profession in the state, and we advocate for best practices to move our profession forward and provide the highest level of care to our patients. This organization is an exceptional one to belong to, as it operates on a local basis, focusing on the needs of the state's audiologists and residents; in addition, it is comprised of highly motivated individuals who desire to set the standard for other state organizations. I truly believe MAA is the right choice to appoint audiologists to the Board of Examiners, and I encourage your support of SB 714 legislation.

Thank you for your consideration.

Sincerely,

Kari Harsh, Au.D.

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

I am a Doctor of Audiology in the northern Baltimore area and I am eagerly requesting your support of SB 714. I was born with single-sided deafness and have multiple family members also affected by hereditary deafness. I use my personal experiences with hearing loss and hearing aids to passionately serve patients of all ages with hearing loss and tinnitus in an audiology clinic (The Hearing Wellness Center) that I co-own with my ENT physician partner.

As a licensed audiologist in the state of Maryland, I am also proud to be a member of the Maryland Academy of Audiology, where I have served on a board as: President, Past-President, President-Elect, Convention Chair, and other volunteer positions. The Maryland Academy of Audiology (MAA) is our state association that represents the voices of licensed audiologists in the state. The MAA serves as a resource for audiologists to ask questions and seek guidance. The MAA provides a space to network with one another for the betterment of our profession and for the benefit of our patients, both virtually over digital platforms throughout the year and physically at our annual convention where we can obtain continuing education units. Most importantly, the MAA has been a forerunner in setting standards for every other state for the autonomy of audiology and what our industry should look like.

I urge you to support SB 714. The bill ensures that an exclusively audiologist-occupied professional state association nominates/appoints audiologists for the Board of Examiners (Audiologists, Hearing Aid Dispensers, Speech-Language Pathologist, and Music Therapists). This bill ensures that the Secretary of Health and Governor has at least 3 properly qualified, professional audiologists for each open BoE audiology seat. The bill does not prohibit individuals from self-nominating. The bill restores consistency by mimicking the nominations/appointments process of the other professions. **The MAA is the most appropriate and logical organization to recruit, vet, and provide nominees (who will best represent the voices of the majority of Maryland audiologists) to the Board of Examiners (BoE).**

Thank you for your support of SB 714 legislation.

Sincerely, *Sofia Roller*

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

My name is Sarah Hart and I am an audiologist at Allegany Hearing & Balance. I work at our two locations in LaVale and Oakland, Maryland. As an audiologist, I served a myriad of patients and follow them throughout their lifespan. I support pediatric and adult populations with their current needs, be it, hearing aids, cochlear implants, or balance disorders. The profession of audiology is life changing for those we serve as it connects them to the world around them. Audiology has the ability to improve quality of life for patients. The Maryland Academy of Audiology supports the full scope of practice for audiologists in the state of Maryland, which is why I am a member.

The Maryland Academy of Audiology supports audiologists by providing continuing education opportunities as well as educating the public about hearing loss and balance disorders. The academy focuses on the autonomy of audiology ensuring we are able to provide our patients with the best care, while the audiologists have the support they need to practice at the top of our scope. The American Academy of Audiology wants to be at the top of our field, allowing us to set standards for other states for the betterment of the field of audiology.

I am in support of the audiologists, involved in the professional state association being the ones who nominate and appoint audiologists for the Board of Examiners. This will allow those who are involved in the field to interact and nominate the best candidates. This also enables the field of audiology to act as other professional fields when it comes to nominations. A change in this bill will not hinder self-nominations, but will ensure the Secretary of Health and Governor has at least three qualified audiologists for the each open Board of Examiners seat.

Thank you for your support of SB 714 legislation.

Sincerely,

Sarah F. Hart, AuD

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

I have been a licensed audiologist in the state of Maryland for 18 years, currently working in a private audiology practice in Ellicott City, MD. Previously I have worked for a private practice in Rockville, MD and spent one year in a residency position at the National Naval Medical Center in Bethesda, MD. As an audiologist in Maryland, I strive to provide my patients comprehensive care for their hearing and balance healthcare needs. I see children and adults for diagnostic hearing evaluations, tinnitus evaluations, and hearing aid fitting, care, and maintenance.

The Maryland Academy of Audiology (MAA) is comprised of audiologists licensed in the state of Maryland. The MAA provides counseling and advocacy to help members achieve career and practice objectives, offers an annual convention for audiologists to network and continue their education in the field, sets standards for other states to follow, and provides resources to patients who are seeking hearing and balance healthcare. I am a member of the Maryland Academy of Audiology and have served on the Board of Directors for the Maryland Academy of Audiology for the past 6 years. I am currently serving as the President of the Maryland Academy of Audiology. I belong to and serve the MAA because it is the only state organization in Maryland that focuses on the interests of audiologists and no other profession, thus most accurately understanding and representing the issues facing my profession and the interests of hearing and balance healthcare patients.

There are numerous reasons that the Maryland Academy of Audiology should be the organization to nominate audiologists to an open seat on the Board of Examiners of Audiologists, Hearing Aid Dispensers, Speech-Language Pathologist, and Music Therapists:

- Only state organization representing only audiologists
- Most accurately understands and represents the issues facing my profession and the interests of hearing and balance healthcare patients.
- Ensures the Secretary of Health and the Governor have at least 3 qualified, professional audiologists for each open Board of Examiners audiology seat
- Mimics the nomination process of other providers on the Board
- Legislation does not prohibit individuals from self-nominating

Thank you for your support of SB 714 legislation.

Sincerely,

Jennifer Kincaid, Ph.D.

Annapolis, MD 21401

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

My name is Dr. Chelsea Lambie and I am an audiologist at Allegany Hearing & Balance in Lavale and Oakland, Maryland. I work with a variety of patients in Allegany and Garrett county ranging from newborns to elderly. In our offices, we provide audiological care in the form of hearing evaluations, hearing aid fittings, cochlear implant programming, and balance evaluation and treatment. I am currently a member of the Maryland Academy of Audiology.

The Maryland Academy of Audiology (MAA) is a body comprised only of audiologists with focus on promoting better hearing and balance care to our patients. MAA provides resources to practicing audiologists to promote professional autonomy, continuing education, and increase public awareness of hearing and balance disorders. As an MAA member, I feel pride in knowing that my fellow members have our patients and our profession as top priorities when making decisions regarding changes in legislation and governing bodies.

SB 714 was created to promote the appointment of qualified, professional audiologists for each Board of Examiners audiology seat. By allowing MAA to nominate competent audiologists for open positions, we can ensure legislative changes can be made by passionate and dedicated individuals with the best interests of patients and audiologists in mind. This bill does not limit non-MAA members from holding positions on the Board as non-members still have the ability to self-nominate. The change presented in this bill reflects other professions' nominations and appointments such as otolaryngologists, hearing aid dispensers, and music therapists.

To conclude, supporting SB 714 will allow Maryland audiologists to be governed by a Board that is comprised of individuals that are passionate about our profession and our patients.

Thank you for your support of SB 714 legislation.

Sincerely,

Chelsea Lambie, AuD, FAAA

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

I am a full-time private practice audiologist and a small business owner in Western Maryland. My office, Allegany Hearing & Balance, currently serves patients of all ages in the rural regions of the state out of our two locations in LaVale and Oakland. We offer a wide variety of services to the members of our communities, including diagnostic hearing exams, full neuro-diagnostic vestibular evaluations, cochlear implant services, tinnitus evaluations and management solutions, prescription hearing aid fittings and follow ups, and Over-the-Counter hearing devices. I am also a member of the Maryland Academy of Audiology where I currently serve on the Board of Directors as a Member at Large.

The Maryland Academy of Audiology provides exceptional value to the audiologists that it serves by providing a wide range of continuing education opportunities, updating its members on legislative issues and changes, increasing awareness about the field of audiology as well as hearing and balance disorders, and by supporting our professional autonomy. The mission of the MAA is to enhance the field of audiology and to continue to provide the highest quality of services to its members. It is because of this high standard and focus to the profession that I have chosen to belong to this particular organization and serve on its Board. The collaboration among the top professionals in the state also allows me to practice at the highest level of my scope of practice and to continue to provide outstanding services to my patients.

Because of their high standards and dedication to the audiologists in the state of Maryland, I believe that the MAA should be responsible for nominating candidates for open positions on the Board of Examiners (Audiologists, Hearing Aid Dispensers, Speech-Language Pathologist, and Music Therapists). The proposed legislation is not in any way intended to restrict individuals from self-nominating but to ensure that highly qualified individuals are being considered. This legislation is in alignment with the

other professionals that serve on the Board of Examiners (Hearing Aid Dispensers and Music Therapists). This bill would also ensure that the Secretary of Health and Governor has at a minimum, three qualified, professional audiologists to consider for the open audiology Board seat(s).

Thank you for taking the time to review this information and for your support of SB 714 legislation.

Sincerely,

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

I own an audiology private practice in Leonardtown and I am fortunate enough to serve a variety of patients. I have owned this practice for 15 years and have been licensed in Maryland for 19 years. I am also the immediate Past President of the Maryland Academy of Audiology as well as a former Member At Large.

The Maryland Academy of Audiology promotes audiology in the state and creates a place where Maryland audiologists can promote best practices. We hold an annual convention where audiologists can learn and share ideas.

It is important that audiologists on the Board of Examiners best represent audiology in Maryland. The Maryland Academy of Audiology is the only organization in the state that can do this. Other boards in Maryland and other states follow these same guidelines and only take nominations from their state audiology academy or as self-nominations.

Please consider supporting this bill and feel free to contact me with any questions or concerns.

Thank you for your support of SB 714 legislation.

Sincerely,

Leigh McCarthy, AuD

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

I am an Audiologist in a private practice located in LaVale, Maryland. At Allegany Hearing & Balance, we serve newborns to geriatrics. In a typical day, we conduct newborn hearing screenings, diagnostic hearing tests, hearing aid evaluations, vestibular/neurodiagnostic testing for balance and vertigo, and more. The six audiologists at our practice are devoted to providing evidence-based practices as well as exceptional service. These are core values that the Maryland Academy of Audiology (MAA) also exemplifies.

I am proud of what MAA aims to accomplish in advancing our field and therefore helping more patients obtain effective and efficient healthcare. MAA is a significant presence in terms of advocacy for both patients and providers. MAA strives to have audiologists recognized as autonomous providers, which therefore allows us to better service our patients in an efficient manner. I belong to MAA because as a newer audiologist (two years in the field), I strongly believe that MAA will help audiologists practice to the top of their scope. I know that MAA has the best intentions in regards to helping audiologists obtain autonomy.

As a member of MAA, I believe that the nomination for the open Board of Examiners audiology seats should come from the only professional audiology state association (MAA). As the only governing audiological group in the state, I believe that MAA and practicing audiologists in Maryland will be able to nominate capable and professional audiologists to the open board seats. Having at least three audiologists that are qualified for the position will help ensure that the members on the Board of Examiners have the profession's best interests in mind. Having this nomination process in place will mimic other professions on the board such as music therapists and hearing aid dispensers.

Thank you for your support of SB 714 legislation.

Sincerely,

Alex Murray Au.D, F-AAA

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers,
Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

As a licensed audiologist in the state of Maryland, the passage of SB 714 is very important for myself and my fellow Maryland audiologists. As you know, audiologists are currently nominated for each open Board of Examiners (BoE) position by the BoE while Hearing Aid Dispensers, Music Therapists, and Otolaryngologists are nominated to the BoE by their state organizations. How is it fair that these other professions are able to have their state organizations submit nominations for these open positions while audiologists are left to rely upon the BoE to nominate us to the BoE? A group that is not a representation and a voice for audiologists in the state should not choose who is nominated to be on the BoE. This should be done by the group the state organization for audiologists, which is The Maryland Academy of Audiology (MAA). MAA works very hard to provide counseling and advocacy to help members achieve career and practice objectives, and provides continuing education hours through their annual two-day conference which takes place in the fall. As a board member since 2023, I can attest to the work that MAA board members put into educating audiologists in our state and keeping members informed. Allowing MAA to be the nominating group for open BoE positions ensures that we as fellow audiologists feel comfortable with the nominees/appointed individuals representing us on the BoE. While the American Speech-Language-Hearing Association (ASHA) and The American Academy of Audiology (AAA) are just two of the largest organizations with audiologists, these groups focus more on what is happening with audiology as a whole and not specifically in Maryland. They do not send member updates about state-specific legislative updates and changes. That comes from MAA, as MAA is truly the voice of audiologists in Maryland. Changing this appointment process would ensure that the Secretary of Health and the Governor have at least three qualified professional audiologists for each

open BoE audiology seat and that the nominations and appointments mimic the nominations and appointments of the other professions on the BoE.

Thank you for your support of SB 714 legislation.

Sincerely,

RE: 5B 714 State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members
Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

As an audiologist in Maryland of almost 30 years, I am very connected to the audiology community. Having served the consumers of Maryland in clinical, academic, and advocacy roles, I have a strong knowledge of best practices and consumer protection which our patients should all be represented by.

I am a member of the Maryland Academy of Audiology which is the only state organization that supports best practices, to ensure the consumers of Maryland are provided with the most professional and ethical care. Our board is composed of passionate audiologists who volunteer their time to ensure that our members are educated on cutting edge research and the legislative issues that impact the care of our patients. The Maryland Academy of Audiology represents the excellence of the audiologists who hold themselves to the highest ethical standards for the consumers they serve in the state of Maryland.

In closing, your support of SB 714:

- Ensures the audiology (only) professional state association nominates/appoints audiologists for the Board of Examiners (Audiologists, Hearing Aid Dispensers, Speech-Language Pathologist, and Music Therapists).
- Ensures the Secretary of Health and Governor has at least 3 qualified, professional audiologists for each open BoE audiology seat.
- Does not prohibit individuals from self-nominating.
- Mimics the other professions' nominations/appointments represented on the Maryland BoE.

Thank you for your support of SB 714 legislation.

Sincerely,

Candace G. Robinson, AuD

RE: **SB 714** State Board of Examiners for Audiologists, Hearing Aid Dispensers, Speech-Language Pathologists, and Music Therapists - Appointment of Members

Position: **SUPPORT**

Madam Chair Beidle, Vice Chair Klausmeier, and Committee Members,

As a licensed practicing audiologist for over 26 years and small business owner of one of the largest and oldest private practices in the State of Maryland, I would like to express my support for SB 714. I currently have 10 office locations in Maryland, including the Eastern Shore, and provide hearing and balance healthcare services to patients of all ages. I have also served on numerous Maryland Academy of Audiology (MAA) board positions from 1998 to 2010 and was actively involved in nominating audiologists for the Board of Examiners (BOE) audiology open seats at that time. I feel strongly that MAA is the ONLY qualified professional state organization to nominate audiologists for the BOE audiology open positions as opposed to other professional organizations.

The MAA truly represents the “Voice of Audiology” in the State of Maryland. It is the ONLY Maryland organization that is dedicated to meet the needs of audiologist and both improves and promotes professional audiology services to all people with hearing and balance impairment. Additionally, it is the ONLY state organization that consists of university-trained audiologists practicing in a variety of occupational settings and fosters the ability of its members to achieve their career professional objectives by providing continuing education experiences.

This legislation WILL NOT prohibit individuals from self-nominating. It mimics other professions’ nomination/appointment process. It will ensue that the Secretary of Health and Governor have 3 qualified professional audiology nominations to serve thus leaving no one in Maryland behind.

Thank you for your support of SB 714 legislation.

Sincerely,

A handwritten signature in black ink that reads 'Briana D. Holtan'.
