The Honorable Pamela Beidle
Chair, Senate Finance
Room 3 East Wing, Miller Senate Office Building,
11 Bladen Street, Annapolis, MD 21401-1991

The Honorable Chair Beidle, Vice Chair Klausmeier, and Members of the Finance Committee:

RE: SB 142 – The Genetic Testing Protection Act of 2024

Position: SUPPORT

My name is Lindsay Gill and I am the Managing Director of Advocacy at the ALS Association. I am writing today in support of SB 142: The Genetic Testing Prohibition on Disability, Life, and Long-Term Care Insurance (Genetic Testing Protection Act of 2024).

It is not our intention for this legislation to negatively impact the life insurance market. We want people to get genetic testing *and* life insurance - but affordably. Our bill does not prevent insurers from accessing an individual's medical record as part of an application exam.

In some cases, genetic test results can prevent a patient from getting a life insurance policy. There are also times that patients are offered coverage at an extremely high premium. That is what our bill addresses: avoiding discrimination as it concerns issuance & price protection. An important distinction is that a genetic test indicates potential health risks – it is not a diagnostic exam and should not be treated as such by life insurers.

Genetic testing and genetic counseling are crucial to family members that have ALS, as it helps to inform prevention, future treatment options, innovative breakthroughs for this devastating disease, and important life decisions. Despite the progress that has been made for the ALS community, there have been multiple studies and real-life examples that show that the fear of genetic information being used against them is one reason people say they do not get tested. Thus, the threat of genetic discrimination creates a serious dilemma for Marylanders — risk their physical health because they do not know their genetic status or risk their financial health because they do.

The Genetic Testing Protection Act will help allay this fear by putting protections in place for accessing life and disability insurance by people who have undergone genetic testing, requested genetic testing, or received genetic test results. Such protections will not only benefit those living in this state, but through the amazing science being done in Maryland, bring life-changing new genetic therapies to everyone who needs them faster.

For all these reasons, I respectfully request your support for The Genetic Testing Protection Act. Thank you to Senator Klausmeier for introducing this legislation and to the members of the Senate Finance Committee for your time and consideration.

Sincerely,

A handwritten signature in black ink that reads "Lindsay Gill".
