

Dear Delegates of the Health and Government Operations Committee,

I am not in favor of this bill. This bill not only puts our community in jeopardy of unsafe radiation practices. It is opening a new way for the certified or uncertified medical assistance to be under paid for their duties and new responsibilities. There is a reason why radiologic technologist go through an intense 2-year program. There is a lot of written and clinical experience covered in the program that cannot be replicated in an urgent care environment. Please consider the huge negative impact this can have to our state of Maryland.

Theresa Meyers R.T.(R)(ARRT)
