

MARYLAND SOCIETY OF ANESTHESIOLOGISTS

Date: March 7, 2023
Committee: The Honorable Delegate Joseline Peña-Melnyk, Chair
House Health and Government Operations Committee
Bill: House Bill 767 – Maryland Medical Assistance Program - Adult and Pediatric Dental Services - Reimbursement Rates
Position: SUPPORT

The Maryland Society of Anesthesiologists (MSA) is a state component society of the American Society of Anesthesiologists (ASA). The MSA is a non-profit physician organization dedicated to promoting the safest and highest standards of the profession of anesthesiology in the State of Maryland. Our purpose is to advocate on behalf of our members for their patients through policy, education, and research.

As introduced House Bill 767 would require *“the Maryland Department of Health, on or before January 1 each year, beginning in 2025, to conduct a certain review of billed charges and reimbursement rates for adult and pediatric dental services and report the findings to certain committees of the General Assembly; and requiring the Department, based on the data obtained from the review, to revise the rates for adult and pediatric dental services provided under the Maryland Medical Assistance Program to ensure sufficient access to care for Program recipients.”*

House Bill 767 takes an important step to ensure that the Medicaid Pediatric and Adult dental program can operate to its fullest potential. Anesthesiologists are the physician provider in these cases, many of which must be done in the hospital operating room setting. The children receiving dental care may often require general anesthesia to allow the dentist to perform extensive procedures to repair and in some cases remove a child’s teeth. These procedures have been subject to an ongoing imbalance with the physician anesthesiologists involved in the care of these patients. The regular review of rates and corresponding rate updates will help to sustain the program moving forward.

Pediatric dental surgeries are complex and difficult cases that require very young patients to be fully anesthetized, and often times the anesthesiologist may be the sole physician provider involved in their care. Anesthesia groups in Maryland cannot sustain their viability with low commercial rates and the underpayment of Medicare and Medicaid. This in turn negatively impacts patient care, especially the availability and timeliness of procedures and surgeries.

We applaud the State’s goals and have attempted to be a meaningful part of the pediatric Dental Medicaid program since the beginning. The anesthesiologists and the dentists are partners in these dental surgery cases when treating these vulnerable pediatric patients. We ask that Medicaid provide fair payment to ensure the anesthesiologists are available to staff hospital ORs to address this resurgent crisis.

Thank you for your attention to this important matter.
