

SB0059

OPPOSE

Dear Committee Members:

This bill implements a tax-payer funded misinformation campaign. It is designed to heighten awareness about SIDs and ways to prevent it, and yet the information provided ignores one of the big factors that leads to SIDs – vaccines. In fact, previous flyers have stated that vaccines do not cause SIDs. Any recommendations made about this topic should include science and statistics about ALL the contributing factors, and not ignore a really big one. Under this bill, birth facilities and hospitals will be penalized for not spreading this lie-by-omission. Please oppose SB0059.
