Position Statement on House Joint Resolution 4 (HJ 4): Aligning With the Blueprint for an Artificial Intelligence Bill of Rights (Maryland Safe Artificial Intelligence Act)

Carrington & Associates, LLC proudly supports House Joint Resolution 4 (HJ 4), introduced by Delegates Bhandari and Allen. This resolution underscores the General Assembly's commitment to align with the Blueprint for Maryland's Future for an Artificial Intelligence Bill of Rights, emphasizing crucial principles for responsible artificial intelligence (AI) development and deployment.

HJ 4 prioritizes safety, effectiveness, algorithmic discrimination protections, data privacy, notice and explanation, and the consideration of human alternatives and fallbacks. These principles provide a robust foundation for ethical AI practices, ensuring technological advancements align with the protection of public rights and opportunities.

The resolution's dedication to examining and implementing these principles in legislative and policy frameworks showcases the General Assembly's proactive stance on governance in the AI domain. While HJ 4 does not directly impact the State's fiscal aspects, its implications are significant for fostering responsible AI development and deployment.

Carrington & Associates, LLC acknowledges the importance of legislative involvement in navigating the complexities of emerging technologies. We lend our support to HJ 4 as a meaningful stride towards responsible governance in the rapidly evolving AI landscape.

As a firm deeply engaged in technological advancements, Carrington & Associates, LLC recognizes the transformative potential of AI and the necessity for a robust regulatory framework. HJ 4 aligns with our commitment to ethical and responsible AI practices, providing a roadmap for the State to navigate the evolving landscape while safeguarding the interests of the public.

Our endorsement of HJ 4 reflects our belief in the importance of collaborative efforts between the private sector and legislative bodies to shape policies that balance innovation with ethical considerations. We look forward to continued collaboration on initiatives that foster responsible AI development, ensuring its positive impact on our community and beyond.
