The Honorable William C. Smith, Jr., Chairman Senate Judicial Proceedings Committee 2 East, Miller Senate Office Building Annapolis, MD 21401

RE: SB449 – Criminal Procedure – Incompetency to Stand Trial Dismissal

Dear Chairman Smith and Members of the Senate Judiciary Committee,

The current version of CP 3-107 puts the public at unnecessary risk by requiring that dangerous incompetent defendants charged with murder have their charges dismissed after five years.

Prior to 2012, CP 3-107 required incompetent defendants who were charged with murder to have their charges dismissed after 10 years as a result of 2006 amendments to the statute. In 2005, numerous public interest groups (including the Office of the Public Defender (OPD) and the Maryland Disabilities Law Center (MDLC)) participated in workgroups that involved long discussions and compromise to balance the rights of defendants with disabilities against society's interest in public safety resulting in significant amendments to CP Title 3.

In 2012, when the death penalty was repealed the term "capital case" was stricken from all of the statutes. Therefore, with no discussion or consideration of the consequences, the time period for dismissal of charges in CP 3-107 for dangerous incompetent defendants charged with murder was inadvertently reduced to five years from ten years thus reversing the hard work of the numerous public interest workgroups.

Requiring the charges of defendants who are charged with murder to be dismissed after five years allows dangerous defendants to be released unsupervised into the community. If an incompetent defendant has an intellectual disability and is dangerous, once his charges are dismissed the only option for the court is to commit him to the Developmental Disabilities Administration (DDA) for 21 days to determine if he is eligible for services. DDA cannot consider him dangerousness.

They will assess whether he qualifies for DDA services and **offer** such services to him. The services are not mandatory and he is under no court order to accept the services. If he refuses the services, he is released into the community with no supervision. If an incompetent defendant has a mental illness and is dangerous, once his charges are dismissed, if he meets certain criteria, the court can civilly commit him to the Maryland Department of Health (MDH). However, there is no oversight and once the hospital determines the defendant is no longer dangerous (which may be a lower threshold that the court), the defendant will be released into the community with no supervision and no requirement to continue mental health treatment.

Allowing the charges to be open for 10 years will allow more time for the dangerous defendant to be restored to competency and will allow additional time for him to receive treatment and services minimizing the risk to public safety.

SB 449 will help protect our most vulnerable victims - children and individuals with disabilities.

Often times, the victims of crimes committed by incompetent individuals are either children or other individuals with developmental disabilities. Because of the vulnerability of these victims, they are easy targets and less able to defend themselves against such violent acts.

Case in Point-In Baltimore City, an incompetent defendant who was charged with murder after he admitted to killing his girlfriend was released into the community with no services. He tortured the victim over a two day period where he tied her up, beat her about her entire body and knocked out her front teeth, broke her nose, poured boiling water on her, and heated a poker on the stove which he used to burn her about her body and sexually assault her.

After he was charged, he was diagnosed with a mild intellectually disability and found incompetent to stand trial. He was in a community DDA program the last eleven months of his five year incompetency status.

At the five year mark, the State filed a petition for extraordinary cause requesting his charges be extended. The director of his DDA program testified that he was receiving court ordered 1:1 services (an aide who is trained to work with individuals who have behavioral issues and stays within arm's length of them to deescalate dangerous behavior) 24 hours a day seven days a week and without his 1:1 aide, he would be a threat to those around him.

She testified how he needed to be redirected daily and physically kept away from their vulnerable population for their safety. The court found that because of *Ray v. State*, 410 Md. 384 (2009), she could not find extraordinary cause existed and dismissed his charges. Despite his DDA program attempting to convince him to retain their housing and services, he left the program immediately. He is now somewhere unsupervised in the community.

### The passing of SB 507 will not violate the rights of incompetent defendants.

One of the reasons for the 2006 amendments to CP 3-107 was a law suit filed by the Maryland Disability Law Center on behalf of incompetent defendants claiming their rights were violated because they could be indefinitely institutionalized, they could be committed for longer than the maximum sentence had they been convicted and there were no court reviews of the commitments.

The 2006 amendments provided that there would be no indefinite commitments, a defendant could not be committed longer than the criminal penalty of the crime for which he was charged, and regular court reviews were required. Passing SB 507 will continue to protect these rights and will not affect these three changes to the statute. Another reason for the 2006 amendments was the holding in *Jackson v. Indiana*, 406 U.S. 715 (1972).

The *Jackson* court found that it was a violation of due process to commit someone longer than reasonably necessary to determine if they could be restored to competency but specifically declined to make a ruling about whether an incompetent defendant's charges should be dismissed. When discussing *Jackson*, commitment to an institution and dismissal of charges should not be conflated. SB 507 is consistent with the holding in

*Jackson*. Furthermore, the statute requires that every 6 months the court reassess competency and if an individual is found to be unrestorable to competency, the charges will be dismissed. This safeguard will prevent individuals who are committed as incompetent from being held longer than is reasonably necessary to be restored to competency.

Case in Point- In Baltimore City, a defendant with an intellectual disability was charged with raping a 6-year-old girl over a period of months until the girl's mother walked in on them. He was charged with Rape and Sex Offense of a Minor and committed to a State facility for individuals with developmental disabilities. While at the inpatient program, pursuant to CP 3-106, a community treatment plan was developed to allow him to reside in the community on pretrial status. Currently, he resides in a community residential treatment facility receiving numerous services and daily activities to include trips to the YMCA, gym to workout, community park, various grocery stores, movies, and Walmart.

SB 507 will only allow an extension of the time period for mandatory dismissal of charges for those defendants who are dangerous and a threat to public safety.

SB 507 will not affect the court's ability under 3-107 (b) to dismiss the charges at *any time* if the court believes resuming the charges would be unjust.

Sincerely,

Tracy Varda

### Testimony Supporting Senate Bill 449 with Technical Amendments Lisae C. Jordan, Executive Director & Counsel

February 9, 2024

The Maryland Coalition Against Sexual Assault (MCASA) is a non-profit membership organization that includes the State's seventeen rape crisis centers, law enforcement, mental health and health care providers, attorneys, educators, survivors of sexual violence and other concerned individuals. MCASA includes the Sexual Assault Legal Institute (SALI), a statewide legal services provider for survivors of sexual assault. MCASA represents the unified voice and combined energy of all of its members working to eliminate sexual violence. We urge the Judiciary Committee to report favorably on Senate Bill 449 with Technical Amendments.

### Senate Bill 449 – Crime Victim Rights – Right to Petition to Extend Charges Based on Extraordinary Circumstances and Continued Supervision of IST Defendants

Maryland law correctly limits the length of time a person may be detained after a finding that they are incompetent to stand trial (IST). If the defendant was charged with a felony or a crime of violence under § 14-101 of the Criminal Law Article, the court must dismiss the charge after the lesser of the expiration of five years or the maximum sentence for the most serious offense charged. For all other defendants, the court must dismiss the charge after the lesser of the expiration of three years or the maximum sentence for the most serious offense charged. Both the State's Attorney and the victim must be notified of the contemplated dismissal, however, only the State's Attorney may file a motion to continue charges based on extraordinary cause. This bill would grant victims the right to petition the court to extend the time to dismiss a charge regarding a defendant who has been found incompetent to stand trial. Senate Bill 449 also expands the maximum period of supervision when there are charges of sexually assaultive behavior or first degree murder to 10 years.

Continued charges and supervision protect victims and the community when a defendant is both IST and dangerous. It is critical to understand that if charges are not continued, the defendant will no longer have supervision. Last session, this bill was introduced following the unreported opinion, *MO v. State*, filed by the Court of Special Appeals, March 24, 2021, and submitted with this testimony. In this case, a known and dangerous sex offender was approaching the 5 year limit on his IST status and a motion to dismiss charges was filed. The State's Attorney failed to file a motion to continue the charges, although they did oppose the motion to dismiss. The victim presented compelling testimony regarding the danger the defendant posed.

In the case prompting this bill, Terrell Nowlin was charged with two counts of Second-Degree Sex Offense and one count of Sodomy. The incident occurred on February 28, 2011 when the victim, J.O., and Mr. Nowlin participated, as athletes, in a Special Olympics event. Mr. Nowlin was found incompetent to stand trial. In reviewing the motion to dismiss charges, the court made a number of findings regarding the risk the defendant poses:

Because of this case, [the Defendant] is also subject to an order that creates heavy supervision and structure designed to mitigate the risk that Defendant Nowlin presents to public safety. Despite this significant structure and supervision in a residential setting that specializes in supporting those with developmental disabilities, Defendant has, in the past, been in contact with the victim and victim's family. Because this Defendant has made prior threats to the victim, the contacts have caused severe distress to the victim and his family in violation of the conditions of the supervision order.

Also, in direct violation of Defendant's release conditions and the structure in his residential program, in the past Defendant was able to create and function with many social media accounts and he was able to download and view large amounts of pornography. Viewing of pornography on the internet creates an increased risk that Defendant Nowlin may sexually assault someone else. To mitigate that risk, the [c]ourt required 24/7 supervision of Defendant. After the 24/7 supervision requirement, Defendant Nowlin made no more contact with the victim's family and had no more exposure to pornography.

In terms of the risk that Defendant Nowlin may sexually victimize someone in the future, the [c]ourt must consider that before Defendant Nowlin sexually assaulted the victim in this case, he was convicted of forced sexual assault upon someone else. With two convictions for forced sexual assault, the [c]ourt must conclude that Defendant Nowlin presents a future risk to others. Even with a prior conviction for forced sexual assault, Defendant Nowlin, with his disabilities, was not supervised adequately to prevent the sexual attack that resulted in this case. Another compelling circumstance that enhances the public safety risk is that because of Defendant's own developmental disabilities, Defendant lives with and is in programs with other developmental disabled and uniquely vulnerable individuals.

The Court also highlighted the effect the dismissal of charges has on supervision of the IST defendant, noting:

After dismissal of this case, the [c]ourt has little confidence that the 24/7 supervision will continue. The [c]ourt, therefore, would have found (if the statute did not prevent this action) that dismissal of this case creates a significant safety risk that this Defendant will sexually victimize someone else in the future (and perhaps multiple people).

Both the trial court and the appellate court noted that the Courts' hands are tied because the statute does not permit the Court to accept the victim's petition to extend the time to dismiss charges and the State's Attorney filed to file the appropriate motion. Senate Bill 449 corrects this deficiency in the statute and helps make the promise of crime victim rights a reality. Senate Bill 449 does not mean the Courts will grant a crime victim's request, but it will give victims the ability to ask the Court for needed relief in extraordinary cases.

### **Amendments (technical)**

Senate Bill 449 incorrectly includes language regarding Not Criminally Responsible (NCR) defendants. Since NCR is a disposition, there is no longer a case to be dismissed. MCASA respectfully suggests deleting page 2, lines 20-28.

## TESTIMONY SB 449 SENATE JUDICIAL PROCEEDING COMMITTEE FEBRUARY 9th, 2024

"Let the public safety be the highest law" – Cicero – 54 BCE or two thousand and seventy seven years ago, Cicero first set this critical thought to paper. It should be a guiding principle for all we do in the realm of criminal justice. Preservation of rights sometimes demand a higher priority, but then the safety of the public should come next.

Our organization has been involved in a number of cases regarding those who have been determined to be incompetent to stand trial after being accused of heinous acts. This bill pours ten gallons of common sense on several problems with the law regarding incompetency.

The first measure of common sense is to allow the victim the opportunity to move for the extension of time for dismissal of charges as opposed to merely the State's Attorney. We have been down this road before. In a recent case, we had the Assistant State's Attorney actually admit to us that she was not concerned to move to extend the time for dismissal, because the Defendant intended to move far outside her county, where he would not be her problem any longer. This kind of attitude is shocking, but not rare. We could get lost in a conversation of other problems within the system that cause prosecutorial frustration levels so high as to take such a callous position openly. But the best remedy to the situation is allowing the victim to independently move for the extension of time for dismissal of the charges.

The second dose of common sense is extending the period of time after which dismissal is required for serious cases. Again, our organization has been down that road, as well. When an accused violent sex offender murderer stands to have their charges dismissed after five years of incompetency, this is a serious mistake in Maryland's current criminal statutes. There need be no showing that the person is no longer a danger to society, only a showing that five years have passed. This law would extend that period to a reasonable amount. However, we do not believe that this law goes far enough and should include all "crimes of violence". There are many violent offenses remaining under the lower five-year standard. Nonetheless, an expansion of ten years for Murder First and all of the sex offenses in is a positive step for victims.

Our State's Attorneys overall are very good at what they do, within the system in which they operate. But that system is exceedingly fast-paced, and requires most of their energy to focus of the tidal wave of new cases facing them every day. It is difficult for them to swim back upstream to address five-year-old issues. This is one of the reasons that it is important to allow the victims to move for extension of the time to dismissal as well. Please give a favorable report to SB 0449. Thanks so much to Bishop Senator Muse for this refreshing assistance to a fundamental problem.

Wes Moore, Governor · Aruna Miller, Lt. Governor · Laura Herrera Scott, M.D., M.P.H., Secretary

February 9, 2024

The Honorable William C. Smith, Jr. Chair, Senate Judicial Proceedings Committee Room 2 East Miller Senate Office Building Annapolis, MD 21401-1991

### RE: Senate Bill 449 - Criminal Procedure - Incompetency to Stand Trial Dismissal

Dear Chairman Smith and Committee Members,

The Maryland Department of Health (Department) respectfully submits this letter of opposition for Senate Bill (SB) 449 - Criminal Procedure – Incompetency to Stand Trial Dismissal. Under current law, when a defendant is charged with a felony or a crime of violence, is found Incompetent to Stand Trial (IST), and is not resorted to competency, the Maryland Judiciary must dismiss the charges after the individual has remained incompetent for the lesser of five years, or the passage of time that is equal to the maximum sentence for the most severe crime charged.

SB 449 would double the amount of time in which the Judiciary must wait before dismissing the charges against an IST individual who is charged with first-degree murder or sexually assaultive behavior. Specifically, the judiciary would be required to dismiss the charges after the individual has remained incompetent for the lesser of ten years, or the passage of time that is equal to the maximum sentence for the most severe crime charged.

The Department opposes SB 449 because it impacts the clinicians' ability to make clinically sound and independent determinations relating to discharge. The purpose of the Department Healthcare System's psychiatric hospitals is to provide therapeutic treatment to individuals with severe mental illness. This legislation increases the time an individual would be forced to remain in an inpatient setting, overriding the ability of clinicians to discharge an individual who could be maintained safely and appropriately in a less restrictive community level of care. Department psychiatric hospitals are therapeutic environments, and these commitments are meant to be rehabilitative rather than punitive.

SB 449 also interferes with the Healthcare System's ability to follow the Supreme Court's mandate outlined in *Olmstead v. L.C.*<sup>1</sup> Under *Olmstead*, individuals with disabilities, including behavioral health disabilities, have a right to receive treatment in the community in non-institutional settings. SB 449 would impact the System's ability to discharge individuals to an appropriate level of care for a longer period of time, even if the individual does not meet medical necessity criteria for inpatient behavioral health treatment, violating community integration requirements of *Olmstead*.

Finally, this bill would make it even more difficult for the Department's Healthcare System to comply with the statutory requirement to admit individuals who are court committed within 10 days. The Department's adult psychiatric hospitals operate 1,056 adult psychiatric beds, which are always at almost full capacity. Due to the increase in judicial evaluation and commitment orders, the Healthcare System has a court-ordered admissions waitlist for individuals who have been committed to the Department's psychiatric hospitals. Therefore, this bill could necessitate adding capacity to the existing Healthcare System facilities, particularly at Perkins, which is already undergoing a major Capital Improvement Project, or the building of additional facilities. Any additional capacity added to existing facilities or the establishment of new facilities will require significant construction.

In summary, the Department respectfully opposes this bill because it impacts the ability of clinicians to make discharge determinations as to whether an individual could be maintained in a less restrictive community level of care, impacts patients' rights in accordance with *Olmstead*, and impacts the ability to admit patients timely to the Department's adult psychiatric facilities.

If you would like to discuss this further, please contact Sarah Case-Herron, Director of Governmental Affairs, at sarah.case-herron@maryland.gov.

Sincerely,

Laura Herrera Scott, M.D., M.P.H.

Secretary

**ACTING DIRECTOR OF GOVERNMENT RELATIONS** 

### POSITION ON PROPOSED LEGISLATION

BILL: SB449: Criminal Procedure- Incompetency to Stand Trial Dismissal

FROM: Maryland Office of the Public Defender

**POSITION:** Unfavorable

DATE: 2/2/2024

The Maryland Office of the Public Defender respectfully requests that the Committee issue an unfavorable report on Senate Bill 449.

Senate Bill 449 proposes to Amend Criminal Procedure Article (CP) §3-107(a) in two ways. First it seeks to extend the time for dismissal after a continuous finding of Incompetency to Stand Trial for charges of First Degree Murder or Sexually Assaultive Behavior from five years to ten. Second SB 449 seeks to give victims the ability to petition the court to extend the time for dismissal based on extraordinary cause.

The Office of the Public Defender requests an unfavorable report on this bill for several reasons. First, it is unlikely to pass constitutional review under the principles set forth in *Jackson v. Indiana*, 406 U.S. 715 (1972.) Second, it is unnecessary as the vast majority of people become competent within our current statutory time frame. Third, this statute reaches well beyond situations proponents of this legislation in past years have indicated it is intended to encompass: giving victims a voice, ensuring that people with developmental disabilities are not released despite being dangerous, and extending the time for formerly capital offenses.

### Constitutional Requirements:

People charged with criminal offenses who are committed solely because of they are Incompetent to Stand Trial (IST) cannot be held for more than a reasonable time necessary to determine whether they will ever become competent. *Jackson v. Indiana*, 406 U.S. 715 (1972.) Commitment for incompetency is for the purpose of restoring the individual's ability to participate in a constitutionally fair trial. Tying the length of hospitalization to the severity of the charge is based on

a rationale of punishment rather than treatment, even though these individuals have not—and in fact may never be—convicted of a crime. The time frames outlined in the current statute are reasonable. Research indicates that the vast majority of people become competent to stand trial well within our current statutory time frame. Studies have variously reported restorability between 75% and 95% within a year.¹ In Maryland people who are found incompetent to stand trial, and who are dangerous, are committed either at the Spring Grove Hospital Center, Springfield Hospital Center, and Clifton T. Perkins Hospital; unless they are Intellectually Disabled in which case they go to a Secure Evaluation and Therapeutic Treatment (SETT) Center operated by DDA. While people are committed to those facilities for reasons other than being IST, the average length of stay at these facilities is nevertheless a reasonable gauge of how long it takes for people deemed dangerous to attain competency. According to the Department of Budget and Management, the average length of stay at these facilities for the last two years is approximately: Springfield Hospital: 65 days, Spring Grove Hospital: 363 in 2022, Perkins: 1200 days- 3.28 years.² Maryland has two SETT Centers, the average length of stay for both is one year.³

### <u>Unnecessary legislation:</u>

The proposed legislation is not necessary to achieve the purported goals. As CP §3-107(a) currently stands the time required for dismissal is determined by the seriousness of the offense and longest possible sentence. However, dismissal is not necessarily the end of road for the defendant. People deemed to still be mentally ill may be involuntarily civilly committed to a hospital until such time as they are no longer mentally ill and dangerous—that commitment could last a lifetime. For individuals who are Intellectually Disabled, there are separate administrative procedures in place to address placement and public safety, but this commitment could also last a lifetime.<sup>4</sup>

Under the current law the State's Attorney can already petition the court to find extraordinary cause to extend the time for dismissal. Further, the statutorily required dismissal of the case is without prejudice, meaning that offense could be re-charged by the State's Attorney if they believe the

<sup>&</sup>lt;sup>1</sup> Zapf, Patricia, and Roesch, Ronald. Evaluation of Competence to Stand Trial. Chapter 3, p.55. Oxford University Press (2009)

<sup>&</sup>lt;sup>2</sup> MDH Facility Summaries and Other Supporting Data, pages 11-13. Attached to this document, but which can also be found at: https://dbm.maryland.gov/Documents/MFR\_documents/2022/M00-MDH-Facility-Summaries-and-Other-Supporting-Data.pdf

<sup>&</sup>lt;sup>3</sup> See above, pages 15 & 16

<sup>&</sup>lt;sup>4</sup> See Md. Criminal Procedure Article 3-106(e)(2), and Md. Health General Article 7-502.

defendant has become competent or there is a likelihood that the defendant will become competent in the foreseeable future. For the felony offenses referenced in this bill, there is no statute of limitations, so all of those offenses could be re-charged at any time.

### Notice to victims and opportunity to be heard:

Annual review hearings are required to determine whether a defendant continues to be dangerous and therefore continues to need hospitalization.<sup>5</sup> Victims who have filed a notification request have a right to be notified of these hearings and to attend these hearings. <sup>6</sup> In most, if not all, jurisdictions the dismissal based on the statutory time frames is done at these hearings. As explained previously, the offense can be re-charged by the State's Attorney. Victims have ample opportunity, both before and after a dismissal without prejudice, to convey to the State's Attorney any information which suggests that the defendant is, or has become, competent to stand trial. Additionally, the law already requires notice and an opportunity to be heard to any victim who has requested notification if the court is considering dismissing the case with prejudice based on a finding that the defendant is unlikely to attain competency.<sup>7</sup>

Notice and an opportunity to be heard is not only required in District and Circuit Court proceedings, but also release proceedings heard by the Office of Administrative Hearings.<sup>8</sup> Further, when victims submit written or oral information the Health Department, Court, or Office of Administrative Hearings are required to consider the information when determining release or conditional release.

### Individuals with Intellectual Disabilities

Proponents of pervious iterations of this bill have raised concerns that someone with intellectual disabilities can not be held in a facility beyond 21 days. This is an incomplete understanding of the law. If a person with an Intellectual Disability is found incompetent to stand trial and dangerous they are committed to the Department of Health, who shall require the Developmental Disabilities

<sup>&</sup>lt;sup>5</sup> CP §3-106(d).

<sup>&</sup>lt;sup>6</sup> CP § 11-102.

<sup>&</sup>lt;sup>7</sup> CP §3-107(b) and (c).

<sup>8</sup> CP § 3-123(d)-(f)

Administration (DDA) to provide for the care and treatment of the defendant. <sup>9</sup> If the court finds that the defendant is not likely to become competent in the foreseeable future and dismisses a case, and the individual has an intellectual disability the court shall order the defendant to be confined to a DDA facility for 21 days for the initiation of admission proceedings pursuant to Health General Article (HG) 5-703. Admission for 21 days pursuant to HG 5-703 is only the beginning of that process. Within that 21 day period, DDA is required to hold a hearing before an Administrative Law Judge (ALJ). Once admitted to a residential center people are entitled to another hearing within a year can only be conditionally released if it can be shown that no longer have a need for residential services for their adequate habilitation. Habilitation is defined as "a process by which ap provider of services enables an individual to acquire and maintain life skills to cope more effectively with the demands of the individuals' own person and environment and to raise the level of the individual's mental, physical, social and vocational functioning." People can only be unconditionally released if they are no longer in need of residential services, or if there is an available, less restrictive kind of service "consistent with the welfare and safety of the individual." Although the statutes reference "raising the level of ... social functioning" and the "welfare and safety" of the individual being hospitalized, it can hardly be said that it is consistent with someone's welfare and safety, or raising the level of social functioning, to release them if they are dangerous to others.

### Capital Offenses

Although proponents of previous iterations of this bill support it because it returns the 10 year dismissal time to the formerly capital offense of murder in the first degree, SB449 goes significantly further than that. It would also extend the dismissal times for child sex abuse, first and second degree rape, and third degree sex offense—none of which have ever been capital offenses in Maryland. The statute governing incompetency matters has undergone several iterations over the years in response to constitutional and logistical considerations. Prior to 1967, there was no statutory law providing for dismissal of criminal charges against an individual who could not be restored to competency. Rather, if a defendant was adjudged incompetent to stand trial, he or she would be committed to an

<sup>&</sup>lt;sup>9</sup> CP §3-106(c)(1)(ii).

<sup>&</sup>lt;sup>10</sup> HG§7-101(i)

<sup>&</sup>lt;sup>11</sup> HG § 7-508(a)(2).

<sup>&</sup>lt;sup>12</sup> For a very detailed review of the historical evolution of competency laws, see *Ray v. State*, 410 Md. 384, 407-419 (2009) and *State v. Ray*, 429 Md. 566, 579-584 (2012).

institution, and criminal charges would be stayed until such time as he or she could stand trial. Ray v. State, 410 Md. 384, 407 (2009). State v. Ray, 429 M. 566, 579-380 (2012).

In 2006, the Legislature was moved to scrutinize the entire competency statute following a lawsuit brought by the Maryland Disability Law Center (MDLC) challenging the constitutionality of the statute. MDLC argued that Maryland must adhere to the dictates of *Jackson v. Indiana*, 406 U.S. 715 (1972) and require "that the nature and duration of confinement bear some reasonable relation to its purpose." 429 Md. at 581.

CJP §3-106 was the result of "long discussion and compromise" among members of a multidisciplinary work group convened to examine the statute. Id. at 582. Significant changes were made to the statute, including to section §3-107. HB 795 added a paragraph that mandated dismissal of charges upon expiration of requisite time periods. The revised version also added the language that dismissal is "without prejudice." A ten-year dismissal date was reserved solely for capital cases, no doubt with the understanding that "death is different." See, Ford v. Wainwright, 477 U.S. 399, 411 (1986). In 2013, the statute was again revised to remove the ten-year dismissal time to address the abolition of the death penalty. There was no need to otherwise change the statute. In accordance with Jackson, the statutory time frames for dismissal are outer limits of when a case must be dismissed, rather than a discrete point in time when dismissal must be considered. The Court of Appeals said, "[t]he General Assembly created the upper limit on how long the State may attempt to work toward the goal of making an incompetent defendant become competent." 429 Md. 566, 595 (2012) (Emphasis supplied). Acknowledging that, the Court considered the issue of dismissal of charges in State v. Ray, 429 Md. 566 (2012) and its progeny. See Ray v. State, 410 Md. 384 (2009) (Ray I) and Adams and Ray v. State, 204 Md. App 418 2012)(Ray II). In Ray I, the Court held that extraordinary cause "must require more than dangerousness and restorability," Ray v. State, 410 Md. 384, 419 (2009). In accordance with Jackson v. Indiana, the Court reasoned that if restorability and dangerousness amounted to extraordinary cause, it "could result in indefinite institutionalization, without procedural protection." Id. at 415.

In the final Ray chapter, State v. Ray, 429 Md. 566 (2012), the Court of Appeals took no issue with reindictment, but remanded with directions to make findings as to whether Ray could be restored to competence, a fact which had never been raised or established, Id. at 496, again recognizing the constitutional principle set forth in Jackson v. Indiana, that commitment for competency reasons is

just that. Further extending the time for dismissal of the specified charges is punitive, not restorative.

For these reasons, the Maryland Office of the Public Defender urges this Committee to issue an unfavorable report on Senate Bill 449.

Submitted by: Maryland Office of the Public Defender, Government Relations Division. Authored by: Kimber D. Watts, Supervising Attorney Forensic Mental Health Division <a href="mailto:Kimberlee.watts@maryland.gov">Kimberlee.watts@maryland.gov</a>, 410-767-1839

## MARYLAND JUDICIAL CONFERENCE GOVERNMENT RELATIONS AND PUBLIC AFFAIRS

Hon. Matthew J. Fader Chief Justice 187 Harry S. Truman Parkway Annapolis, MD 21401

#### **MEMORANDUM**

**TO:** Senate Judicial Proceedings Committee

FROM: Legislative Committee

Suzanne D. Pelz, Esq.

410-260-1523

**RE:** Senate Bill 449

Criminal Procedure – Incompetency to Stand Trial Dismissal

**DATE:** January 31, 2024

(2/9)

**POSITION:** Oppose

The Maryland Judiciary opposes Senate Bill 449.

Senate Bill 449 proposes to amend the language in Criminal Procedure Article § 3-107 to state that whether a defendant is confined and unless a victim who has filed a notification request form under § 11–104 of this article or the State petitions the court for extraordinary cause to extend the time, the court shall dismiss the charge against a defendant found incompetent to stand trial. Most notable is the proposed addition of the language that states the following:

(1) When charged with murder in the first degree in violation of Criminal Law Article § 2–201 or sexually assaultive behavior as defined in Courts Article § 10–923, after the lesser of the expiration of 10 years or the maximum sentence for the most serious offense.

Although the Judiciary understands the intent of the amendment, the Judiciary raises the issue that the statute broadly fails to contemplate the issue of restoration to competency.

Each charge has a term of viability, which the added language attempts to address relating to the charges of first-degree murder and sexually assaultive behavior. However, not all persons charged with criminal offenses are restored to competency. If a competency evaluation indicates that a person remains incompetent and dangerous, the evaluator must address the issue of restorability. The evaluator may determine that the person is not restorable, and that determination may be made during the term of viability for the pending charge(s). The proposed amendment to the bill does not contemplate cases wherein the defendant is not restorable. If a defendant remains incompetent and dangerous and the evaluator determines that the defendant is not restorable, then the court must then consider whether the defendant should be involuntarily civilly committed to the Maryland Department of Health. This determination must be made by the court while

the charges are viable and/or in cases where the charges are nearing the expiration of viability.

Additionally, the amendment on Page 2 in Lines 26 and 27 attempts to grant the court authority to extend the term of viability when the victim or victim's representative petitions the court for extraordinary cause. The Judiciary notes that the term "extraordinary cause" is not defined. And, it must be reiterated that if a defendant remains incompetent and dangerous, the evaluator must determine whether the defendant is restorable. At that point, the court must determine whether the defendant should be involuntarily civilly committed to the Maryland Department of Health. Further, even if a court were to determine that a victim or victim's representative has demonstrated extraordinary cause, a request to extend the time for dismissal without a determination of whether the defendant is likely to be restored to competency is not appropriate. As well, an extension of time with information that the defendant is not restorable is not appropriate.

# Senate Judicial Proceedings Committee SB 449: Criminal Procedure – Incompetency to Stand Trial Dismissal February 9, 2024 POSITION: OPPOSE

Disability Rights Maryland (DRM) is the federally-mandated Protection and Advocacy agency for the State of Maryland, charged with defending and advancing the rights of persons with disabilities. DRM is tasked with monitoring state facilities for persons with disabilities, including the state psychiatric hospitals, to protect against abuse and neglect and ensure the civil rights of its patients are protected. DRM has concerns about the constitutionality of SB 449 as written and concludes that if enacted, it may be wasteful and unlikely to produce its intended result.

The purpose of Maryland's laws related to incompetency is to provide restoration services to permit an individual to become competent to stand trial on criminal charges. The weight of the social science research concludes that an individual who is found Incompetent to Stand Trial (IST) and not restored to competency within 5 years is not likely to be restored to competency in 10 years. It is important to remember that such individuals have not been found guilty for any crime by a court of law. Further, it is particularly inappropriate when the person has a co-occurring developmental disability, a traumatic brain injury, or dementia that increases the challenge of restoring the individual to competency to stand trial. Extending the period of time a person can be held as IST before charges can be dismissed will not rectify this problem.

SB 449 proposes to expand the category of crimes that would be eligible for a maximum 10-year period of incompetency prior to dismissal of charges. Specifically, it proposes to include sexually assaultive behavior as defined in § 10-923 of the Courts Article, expanding the list of crimes eligible for the expanded IST timeframe to include such crimes as third-degree sex offense, for example. To the extent that the proponents for this bill argue that the original timeframe for dismissal of charges was 10 years until 2012 and was only dropped to 5 years when the death penalty was abolished, the inclusion of sexually assaultive crimes under § 10-923 of the Courts article is without precedent and overinclusive.

Under Maryland statute, a defendant is found IST if the court finds the defendant is unable to understand the nature or object of the legal proceedings against them or able to assist in their defense. If the court finds a defendant IST and, because of mental retardation or a mental disorder, they are a danger to self or others, the court may order the defendant committed to a facility designated by the Maryland Department of Health (MDH) until the court finds that the defendant is (1) no longer IST; (2) no longer a danger to self or others; or (3) not restorable to competency in the foreseeable future. As a

<sup>&</sup>lt;sup>1</sup> See Bergstein v. State, 322 Md. 506, 516 (1991) ("The deprivation of liberty involved in the initial hospitalization or in rehospitalization clearly is not imposed as a punishment."

matter of practice, this means that individuals are typically held IST for the longest period allowed by law. MDH evaluators rarely opine on dangerousness or restorability unless directed to do so by the courts, or if they do, it is a conclusory statement without facts to back up that conclusion.

While Criminal Procedure (CP) § 3-107 currently provides that the state should dismiss charges upon the lesser of five years or the maximum period of incarceration for a felony or a crime of violence as defined under § 14-101 of the Criminal Law Article, or the lesser of three years or the maximum period of incarceration for all other crimes, the state already retains the ability under the statute to petition the court to extend the time period for charges for "extraordinary cause." Further, under Section 3-107 of the Criminal Procedure Article, any dismissal is without prejudice to the State refiling the charges, and civil commitment under Title 10 of Health-General is always a possibility.

In 1972, the U.S. Supreme Court ruled in *Jackson v. Indiana* that people "cannot be held more than the reasonable period of time necessary to determine whether there is a substantial probability that he will attain that capacity in the foreseeable future.<sup>2</sup> The Court did not set a maximum time limit on attempts to restore competency, leaving it up to the states to make this determination. A number of states base this time limit on research that shows that most people will be restored within six months to a year, and continued treatment and detention to restore competency beyond this time period is unnecessary. Twenty states have a maximum treatment period of one year or less. Yet Maryland bases its maximum treatment period on other conditions, including the maximum possible sentence for the alleged offense, a practice that goes against research and against the purpose of competency treatment. Research on competency restoration for people with mental illness shows that 70 percent or more become competent within six months of starting treatment<sup>5</sup>; nine out of ten will be restored within a year. A very small percentage of people do take longer to be restored to competency, and if substantial progress is shown, and the state's interest in prosecution is great, it may be appropriate to continue treatment for a brief additional period through use of the "extraordinary cause" provision in the statute.

Given the facts that 1) MDH is <u>required</u> to involuntarily commit someone whose charges have been dismissed and is still adjudged to be dangerous, and 2) Maryland law already contains an exception to extend time prior to dismissal of charges on a

<sup>&</sup>lt;sup>2</sup> 406 U.S. 715, 738 (1972).

<sup>&</sup>lt;sup>3</sup> See Grant H. Morris and J. Reid Meloy, "Out of Mind? Out of Sight: The Uncivil Commitment of Permanently Incompetent Criminal Defendants," U.C. Davis Law Review, 1, no.27 (1993).

<sup>&</sup>lt;sup>4</sup> Based on a 2005 review of the 50 state statutes and District of Columbia, conducted by the Maryland Disability Law Center.

<sup>&</sup>lt;sup>5</sup> See, G. Bennett and G. Kish, "Incompetency to stand trial: Treatment unaffected by demographic variables," *Journal of Forensic Sciences* 35 (1990): 403-412; S.L. Golding, D. Eaves, and A. Kowacz, "The assessment and community outcome of insanity acquittees: Forensic history and response to treatment," *International Journal of Law and Psychiatry* 12 (1989):149-179; D.R. Morris and G.F. Parker, "Jackson's Indiana: State hospital competence restoration in Indiana," *Journal of the American Academy of Psychiatry and Law* 36 (2008): 522-534; R. Nicholson and J. McNulty, "Outcome of hospitalization for defendants found incompetent to stand trial," *Behavioral Sciences and the Law* 10 (1998): 371-383.

showing of good cause to the court, there is little risk that someone who is dangerous would be released from a state psychiatric hospital after five years solely because their charges were dismissed because they have not been restored to competency. Extending the time period for dismissal of charges far beyond the time period during which the person is likely to be restored to competency simply makes their treatment in the psychiatric hospital punishment by another name.

For these reasons, we urge that Senate Bill 449 be given an unfavorable report. Should you have any further questions, please contact Luciene Parsley, Litigation Director at Disability Rights Maryland, at 443-692-2494 or lucienep@disabilityrightsmd.org.

# **SB 449 - Oppose - MPS WPS.pdf** Uploaded by: Thomas Tompsett

Position: UNF

February 8, 2024

The Honorable William C. Smith Jr. Senate Judicial Proceedings Committee 2 East Miller Senate Office Building Annapolis, MD 21401

RE: Oppose – Senate Bill 449: Criminal Procedure – Incompetency to Stand Trial Dismissal

Dear Chairman Smith and Honorable Members of the Committee:

The Maryland Psychiatric Society (MPS) and the Washington Psychiatric Society (WPS) are state medical organizations whose physician members specialize in diagnosing, treating, and preventing mental illnesses, including substance use disorders. Formed more than sixty-five years ago to support the needs of psychiatrists and their patients, both organizations work to ensure available, accessible, and comprehensive quality mental health resources for all Maryland citizens and strive through public education to dispel the stigma and discrimination of those suffering from a mental illness. As the district branches of the American Psychiatric Association covering the state of Maryland, MPS/WPS represent over 1000 psychiatrists and physicians currently in psychiatric training.

MPS/WPS oppose Senate Bill 449: Criminal Procedure – Incompetency to Stand Trial Dismissal (SB 449).

Before we turn to our opposition, we would first like to highlight the rigor of Maryland law when determining if someone is and/or remains incompetent to stand trial. Maryland law defines incompetence to stand trial as the defendant's inability to understand the nature or object of the proceedings against them or to assist effectively in their own defense due to mental disorder or developmental disability. To get to this determination, a mental health professional evaluates the defendant and assesses the defendant's mental state and ability to understand and participate in the legal process. The mental health professional will consider the defendant's ability to communicate with their attorney, their understanding of the charges against them, their ability to make decisions regarding their defense, and any mental health diagnoses or treatment history. These findings are then presented to the Court, who, after hearing arguments from both the State and the defense, may find the defendant incompetent to stand trial and then postpone the trial proceedings until the defendant's mental competency is restored. The Maryland Department of Health then provides services aimed at restoring a defendant's competency to stand trial. These services may include mental health treatment, medication, therapy, or other interventions designed to address the underlying mental health issues affecting the defendant's competency. The court may order periodic evaluations to assess whether the defendant's competency has been restored. If the defendant's competency can be restored, the trial proceedings may proceed. If a defendant's competency cannot be

restored within a reasonable period of time, however, the court may dismiss the charges without prejudice, or in some cases, civil commitment proceedings may be initiated.

MPS/WPS is concerned that allowing an alleged victim of a crime, instead of the State, to petition the court for extraordinary cause to extend the time to dismiss a charge against a defendant found incompetent to stand trial for a crime of violence or sexually assaultive behavior could result in unintended consequences. For example, an alleged victim could petition the court to keep a defendant charged with 4<sup>th</sup> degree sex offense, a misdemeanor crime but still "sexually assaultive behavior" under Title 3, Subtitle 3 of the Criminal Law Article, to be held for up to ten years. The maximum penalty for 4<sup>th</sup> degree sex offense is one year on a first offense. This reality could have profound impacts on seriously mentally ill defendants who are sitting in jail while waiting for a hospital bed and are counterproductive to restorative practices.

MPS/WPS, therefore, ask this honorable committee for an unfavorable report on SB 449. If you have any questions regarding this testimony, please contact Thomas Tompsett Jr. at tommy.tompsett@mdlobbyist.com.

Respectfully submitted, The Maryland Psychiatric Society and the Washington Psychiatric Society Legislative Action Committee

# **UNF SB0449 (JPR) vmcavoy.pdf** Uploaded by: vince mcavoy

Position: UNF

### UNFAVORABLE on SB0449 Criminal Procedure – Admission of Out–of–Court Statements – 3 Assault in the Second Degree

vince mcavoy baltimore maryland

Dear Senators of JPR,

This Session and recent sessions we've heard that diatribe of men being "toxic". Statistics from CDC & NIH and elsewhere show that almost 57% of harm to children from women, chiefly their mothers and also other female relatives.

Catherine Hoggle almost assuredly murdered her own two children. Her status in the system and her games played to avoid murder charges have been an outrage. <a href="https://www.washingtonpost.com/dc-md-va/2022/11/30/hoggle-children-disappearance-competency-trial/">https://www.washingtonpost.com/dc-md-va/2022/11/30/hoggle-children-disappearance-competency-trial/</a>

So when I see a bill from Senator Muse stating "AFTER <u>THE LESSER</u> OF THE EXPIRATION OF 10 YEARS OR THE MAXIMUM SENTENCE FOR THE MOST SERIOUS OFFENSE CHARGED" I'm reading that to mean Senator Muse believes that 10 years should be the maximum charge for a mom who (very likely) murdered her own 2 children.

If JPR thinks that 2 children's lives are worth 10 years, I guess you'll vote for this bill. But I am hoping that the ridiculous wave of JPR bills aiming to release criminals ends this year, when the vast majority of Maryland residents HAVE HAD ENOUGH OF VIOLENT CRIME.

I understand this might be worked in Committee. I ask you each to make it clear that these young children, who were old enough to know what was happening when they were murdered and yet too young to do anything but cry, deserve better than "the lesser".

I urge an UNFavorable for this inhuman approach of SB0449. humbly offered ~vince
