

HB1219

Favorable

Dear Committee Members:

Sadly this is a bill that needs to come to fruition in order to save lives of young people adversely affected by the so-called COVID “vaccine” (actually gene therapy). So many young healthy athletes have collapsed during sports activities, starting in 2021. Why is no one asking, “What changed?” just prior to that timeframe? It is clear as day what the cause was. I support this bill.
