

Hb 0012

This bill is strictly aligned with the same principles from the war on drugs. This is saying any "product" that someone can lawfully purchase from another state is now illegal.

That is not the same ruling as any bottle of liquor or alcohol in the states.

This also breaches the accessibility of the consumer to only buying things that are taxed by this state. I don't deem that acceptable when all the products this state allows the sale of from licensed processors is more dangerous than what's in the traditional market or what they can grow their selves.

I personally have had a mycotoxin infection caused by remediated "Cookie branded" cannabis produced by culta in 2022. This has caused Alzheimer's/dementia, heart issues, and kidney malfunctions. This state has made it almost impossible for me to get proper testing and to get answers. Even the doctor that helped with the original testing has disregarded me as patient when I told him the source of the issue and my concerns.
