

Cannabis events and on site consumption

I do not approve of this bill. If they allow alcohol to be recreationally consumed at public spaces and events I believe we have the same rights for recreational cannabis.

Also the control of events and event spaces will do no benefit to the community. It will push out smaller farmers who can grow at home, just like vegetables. I would refer the council to the bill New York just passed allowing cannabis the same freedoms and rights as any agricultural good in the state.

These limitations on events will only further the monopoly our state is already plagued with. Large scale operators from out of state that do not care for the health of the consumer. If you think other wise, ask why they use remediation in flower and concentrates.
