

To whom it may concern;

I am in favor of the current SB0168 bill. I currently live on Whites Cove, which is a cove off Rock Creek. There needs to be a full study performed on the effects of what is being proposed to do to dredge the Baltimore shipping channel. I am a frequent boater that loves to fish, crab, and swim in and around Rock Creek and surrounding water areas and believe the current dredging plan is not environmentally sound. I believe disturbing the bay floor and then re-depositing in the water in a different location is not a good idea.

Regards,

Thoams J. Huber
