**Testimony in Support of SB901, Environment - Packaging Materials - Producer Responsibility Plans**

**Position: Favorable**

Dear Chair Korman, Vice Chair Boyce, and Members of the Environment and Transportation Committee:

As a community volunteer actively engaged in environmental sustainability efforts and a member of the Zero Waste Team in my community, I am urging support for this producer responsibility legislation.

Packaging is adding an increasing amount of material to our overburdened waste system and needs to be reduced. The plans called for in this legislation will be a step toward reaching that goal. Producers play an essential role in reducing waste, and producer responsibility plans will incentivize waste reduction efforts and good stewardship of packaging materials.

I urge a favorable vote on SB901.

Sincerely,

Tom Taylor
