**RE: ATA ACTION SUPPORT FOR HB 1474**

Dear Beidle, Vice Chair Hayes and members of the Senate Finance Committee:

On behalf of ATA Action, I am writing to you to express our support for House Bill 1474 allowing out-of-state licensed professional counselors to treat college students in Maryland.

ATA Action, the American Telemedicine Association's affiliated trade association focused on advocacy, advances policy to ensure all individuals have permanent access to telehealth services across the care continuum. ATA Action supports the enactment of state and federal telehealth coverage and fair payment policies to secure telehealth access for all Americans, including those in rural and underserved communities. ATA Action recognizes that telehealth and virtual care have the potential to truly transform the health care delivery system – by improving patient outcomes, enhancing safety and effectiveness of care, addressing health disparities, and reducing costs – if only allowed to flourish.

House Bill 1474 allows duly licensed out of state health care professionals to treat patients located in Maryland through telehealth if the patient is a student attending an institution of higher education in Maryland but is otherwise not a resident in the state when not attending the institution of higher education. We agree with and support state policies that provide additional authorizations to allow licensed out-of-state providers to treat in-state patients, particularly for continuity of care purposes where a provider already has a relationship with a patient. We greatly appreciate this commitment to advancing telehealth access, particularly across state boundaries.

This legislation is especially impactful as the transition to higher education can present daunting mental health challenges for students, particularly those leaving their home state. Allowing students to continue seeing the counselor they already have a relationship with via telehealth, without requiring additional steps by the provider, will help ease that transition, promote

continuity of care and lead to better patient health outcomes. Furthermore, our organization is supportive of the amendments made to this legislation in the House which removed the potentially restrictive limitations on the number of times counseling services can be provided to the student. We encourage the Committee to advance this legislation with these amendments maintained.

Thank you for your support for telehealth. Please let us know if there is anything that we can do to assist you in your efforts to adopt practical telehealth policy in Maryland. If you have any questions or would like to engage in additional discussion regarding the telehealth industry's perspective, please contact me at [kzebley@ataaction.org](mailto:kzebley@ataaction.org).

Kind regards,
