

I am Max Obuszewski, 431 Notre Dame Lane, Apt. 206, Baltimore, MD 21212, and I am with the Baltimore Nonviolence Center. I am testifying to strongly urge members of the House of Delegates to support HJ-6, the "Back From The Brink" resolution urging the President and Congress to get serious about reining in the new nuclear arms race, canceling the \$1.7 Trillion nuclear arsenal replacement plan and engaging in multilateral treaty negotiations with the idea that nuclear weapons are a danger to Mother Earth. Of great concern to me is that tax dollars are being used to refurbish a nuclear weapons arsenal which cannot be used. As the Trump administration is severely cutting the funding of badly-needed social programs, all members of the House have a chance to vote in favor of HJ-6 and make a statement that money wasted on nuclear weapons should instead be used on social programs that benefit the majority of the people instead of on weapons contracts.
